NOTES  
ON  
FLOWER VARIETIES

M-Z

V. 2  
V  
A. J. Pieters.

TAGETES:

T. lucidus Cav. Mexico. Tender perennial cultivated as an annual. This has a less objectionable odor than the other species. Distinct also in the sessile lanceolate leaves and small, usually 2-3 rayed, flowers in dense terminal corymbs.

T. patulus L. French Marigold. Mexico. Annual; 40-60 cm. high. The flowers of this species are generally marked with red and are smaller than in erectus. The plant forms a much branched bush; leaves darker green than in erectus.

Vilmorin distinguishes three groups:

(a) simplex. Flower heads with only one to three rows ligulate flowers and with many tubular, yellow disk flowers. Only cultivated in the form "variegatus". Ray flowers broad, oval, spatulate, bright yellow in the middle with purple-carmine red brown stripes on each side of the middle. This gives an appearance as if the yellow disk was surrounded by two stars, one yellow and one purple.

(b) tubulosus (Syn. T. paluta tubulosa hort.). All or most of the flowers changed into funnel-shaped, tubular flowers. Each of these flowers may be 1/2 cm. broad and quite deep. There are two forms one tall, 40-60 cm., and two dwarf, 20-30 cm. in height.

(c) ligulosus. Flower head with imbricated, ligulate flowers. Tall sorts, dwarfs, as "Cloth of Gold", "Golden Yellow"; very dwarf varieties, pumila. The latter are very floriferous and lie close to the soil.

T. erectus L. (Syn. T. major Gaertn.). African marigold. The flowers in this species are self colored sulphur to orange yellow. The plants are larger than in patulus, the flowers larger and the scent more pronounced. The type form is single but is not cultivated.

(a) tubulosus. Tall 50-90 cm. Flower heads double; all flowers tubular, dwarf varieties 25-40 cm. high; golden yellow.

(b) ligulosus. Flowers in the head all ligulate.

T. signata Bartl. An insignificant single species. A dwarf, pumila form, usually less than 1 foot high; is in the trade. Flowers small but numerous.

T. lacera. Said in Bailey to be a newly discovered species in Lower California. It makes a compact bush, 4-5 feet high, bearing a profusion of yellow flowers borne in the winter.

Germination of seed good for four years.

1. *Leavenworthia* (L.) Greene  
This has a long history in the  
west. It is also known as *Leavenworthia*  
var. *leavenworthii* (L.) Greene.

2. *Leavenworthia* (L.) Greene  
The history of this species is generally  
the same as that of *Leavenworthia*  
var. *leavenworthii* (L.) Greene.

3. *Leavenworthia* (L.) Greene

(a) *Leavenworthia* (L.) Greene  
This species is generally  
found in the same places as  
*Leavenworthia* (L.) Greene.  
It is also known as *Leavenworthia*  
var. *leavenworthii* (L.) Greene.

(b) *Leavenworthia* (L.) Greene  
This species is generally  
found in the same places as  
*Leavenworthia* (L.) Greene.  
It is also known as *Leavenworthia*  
var. *leavenworthii* (L.) Greene.

(c) *Leavenworthia* (L.) Greene  
This species is generally  
found in the same places as  
*Leavenworthia* (L.) Greene.  
It is also known as *Leavenworthia*  
var. *leavenworthii* (L.) Greene.

4. *Leavenworthia* (L.) Greene  
This species is generally  
found in the same places as  
*Leavenworthia* (L.) Greene.  
It is also known as *Leavenworthia*  
var. *leavenworthii* (L.) Greene.

(a) *Leavenworthia* (L.) Greene  
This species is generally  
found in the same places as  
*Leavenworthia* (L.) Greene.  
It is also known as *Leavenworthia*  
var. *leavenworthii* (L.) Greene.

(b) *Leavenworthia* (L.) Greene  
This species is generally  
found in the same places as  
*Leavenworthia* (L.) Greene.  
It is also known as *Leavenworthia*  
var. *leavenworthii* (L.) Greene.

5. *Leavenworthia* (L.) Greene  
This species is generally  
found in the same places as  
*Leavenworthia* (L.) Greene.  
It is also known as *Leavenworthia*  
var. *leavenworthii* (L.) Greene.

6. *Leavenworthia* (L.) Greene  
This species is generally  
found in the same places as  
*Leavenworthia* (L.) Greene.  
It is also known as *Leavenworthia*  
var. *leavenworthii* (L.) Greene.

There are two types in horticulture, the African, T. erecta, and the French, T. patula. The plants of the former are generally tall and robust and the flowers self colored, very large and double, those of the latter commonly low herbs, much branched at the base and bearing smaller single or double flowers, usually colored yellow and red or maroon.

African Marigold. Tall, vigorous grower, 3 to 3 1/2 feet high. Foliage with strong odor, which is unpleasant to some people. Flowers 2-3 inches across, usually very double.

Eldorado. Colors orange and lemon yellow. The latter especially double and fine quilled in the best flowers. (Ferry's stock by far the best).

Delight of the Garden. Plants not dwarf as stated in Thorburn's catalogue, but very tall. Flowers lemon yellow and with petals curiously crimped. Very double and good.

Double Dwarf from Dreer. Plants dwarf; flowers extremely double and fine, golden yellow. (Dreer's stock excellent).

Tall Orange. This is the latest of the French varieties and has plain double orange colored blossoms.

Golden Striped. Under this name seedsmen list a dwarf variety marked with maroon on a golden yellow base.

Legion of Honor. A dwarf compact, single flowered variety. Flowers golden yellow, marked with velvety red or maroon at the base of the petals. Ferry's strain of Dwarf French is only T. insignis pumila and quite worthless for the garden.

MIGNONETTE:

Reseda odorata. The various varieties are all forms of this species, only one other being recognized in Vilmorin, i. e., Reseda alba L., a tall plant to 90 cm. high; leaves pinnately divided, pinnae entire, smooth, glossy, flower white in fine long spikes.

Germination good three to four years.

Tropaneolum majus:

Leaves round peltate, entire or sometimes slightly undulate. Flowers large, showy, the two upper petals marked with deep reddish brown, all obtuse, peduncles long.

Var. nanum -- a dwarf form with the same characters except size. To this practically all of our Tom Thumb section belong.

T. minus:

A weak form very similar to majus but growing only 40 - 60 cm. in height with all parts smaller and weaker. The leaf veins end in a bristle and the petals each end in a bristle-like point.

T. Lobbianum:

A tall form like majus but more floriferous and blooming earlier. Leaves glaucous beneath, obscurely lobed. Petioles and peduncles pilose. Flowers with calyx long spurred and pilose. This pilose condition is what readily distinguishes this species from the other.

## NEMOPHILA:

Three species are represented most commonly in trade, all annual herbs from western North America. They appear to succeed best when the summers are cool and moist.

N. insignis: Flowers vivid blue, 1/2 to 1 inch in diameter. Low herbs, stems trailing and finally tending to ascend. Leaves pinnately parted.

There are varieties, grandiflora, with large, clear blue flowers, alba, with white flowers and marginata, with flowers blue edged with white.

N. menziesii. Leaves nearly entire, stems straggly, succulent. Flowers light blue to nearly white with dark brown spots toward the center. To this species belong the varieties known in trade as:

Atomaria, white with black spots.

Oculata, white with purple center.

N. discoidalis. Velvety purple red with white eye and white edge. Of this Vilmorin gives several garden forms.

N. maculata. Flowers white with a purple blotch at tip of each petal; flowers 1-2 inches across, showy.

## NICOTIANA:

N. alata (N. affinis of catalogues) (according to Bailey).

Half hardy annual, very satisfactory as far north as Michigan. Plants grow 2-3 feet high and bear a profusion of fragrant white flowers on a much branching inflorescence. Stems and leaves viscid pubescent, leaves medium large, clasping and sometimes decurrent. Flowers borne profusely all the summer. Vilmorin gives both affinis and alata, the latter being 80 to 150 cm. high and N. affinis being 30-90 cm. L. J. M.

N. tomentosa. (N. colossa of some catalogues). A large growing species, very good for tropical effects, though rarely blooming in the north. Stem 8-10 feet high, leaves 1-3 feet long. Flowers short, tube inflated at the top. Color of tube pale green, limb yellowish outside and pale rose within.

N. sanderae. A hybrid between N. affinis and N. forgetiana, a Brazilian species with small purple blossom. Plants about two feet high, freely branching, bearing throughout the summer a profusion of rosy carmine flowers as large as those of N. affinis. Awarded First Class Certificate by the Floral Committee of R. H. S. May 31, 1904; Gold Medal R. H. S. May 31, 1904, and Silver Banksian Medal. Very highly recommended as the best hardy annual introduced of late years. Plant from seed sown in January will bloom in May and continue to bloom all the summer.

## PANSY:

Vilmorin distinguishes several classes, self-colored, striped or "Fancy" pansies, spotted or blotched, marbled, quadricolored, mixed.

In trade the following strains are recognized:

Odier, or five blotched, shape said to be not wholly satisfactory but of large size.

Cassier. strain, 3 or 5 spotted. This is an improvement on Odier. Flowers very large.

Bugnot strain. Petals with large blotches, after the manner of Cassier but the color radiates on the margin of the petals. Flowers large.

Quadricolor or Pheasant's Eye. Upper petals sky-blue eyed with violet, lower petals marbled.

Trimardeau. A strain of giant flowered blotched pansies. The petals are usually marked with three large blotches. This when well grown is usually desirable. Habit of plants compact and flowers borne well above the leaves.

Madam Peret. A new French strain with large flower, distinguished by great diversity of color, especially red shades. Edge of flower of another color than that of the body of the petal.

Germania. This strain offered by Haage & Schmidt and would seem to be what Henderson calls his giant ruffled strain. Flowers large, the petals five-spotted, undulate, and frilled at the edges. Burpee's Imperial German is only a mixture of various strains and is not this type.

## PAPAVER:

Vilmorin groups all annual garden forms under three species, there being single and double varieties in each.

Papaver somniferum. Tall 80-120 cm., more rarely 50-60 cm. Stem leaves clasping stem and leaves smooth and glaucous. Flowers from white to deep black violet. Large stigma; many rayed. Two groups:

(a). With petals entire or only slightly undulate. Of this class there are single and double forms.

1. Single:

Danebrog. Scarlet with white spots on each petal.

Mephisto. Scarlet with black violet spots (Note that Thorburn says Mephisto is fringed)

2. Double: (Syn. *P. paeoniflorum*) Paeony flowered double. Those varieties that are distinguished by flowers that are sharply spotted, edged, or striped, of various colors: e. g., white sprinkled or edged with red; lilac sprinkled with red; bright rose with white; white striped carmine (The Mikado) are known in trade as *P. mursellii* fl. pl.

(b). Fringed poppies, those with the edges of the petals deeply cut or fringed. This group contains only double flowers.

In both forms varieties of different size from tall to medium and dwarf occur.

Papaver rhoeas: Plants bushy, 30-60 cm. tall. Stems and leaves hairy; flowers fiery red, the petals having a black spot at the base and the stamens black; capsules smooth, short obovate; stigma 8-12 rayed.

There are garden forms with double flowers in various colors. Here belongs the pompon poppy (*P. rhoeas* fl. pl. *japonicum*) with small very double flowers and the forms known as *Ranunculus* flowered. The subspecies *P. commutatum* Fisch. pr. sp. belongs in this group. Flowers single with the basal spot nearly in the middle of the petal.

Shirley poppies belong to this species according to Bailey.

P. dubium. 30-60-100 cm. high. Differs from *Rhoeas* chiefly in the shape of capsule, this being smooth and long club shaped; capsule disk 8-9 lobed. Under this species Vilmorin places such forms as

(a) *Umbrosum.* From the Caucasus. Petals broad, dazzling scarlet with a large black spot covering often two-thirds of the area of the petal. Form fl. pl. occurs in which the stamens have been changed to petals

PAPAYER (Continued):

and each shows the black spot at its base. From seeds 50-60 per cent of these double forms come true.

(b). Pavonium. From Turkestan; 45-60 cm. high. Flowers 7-9 cm. across and three colored. At base a large bright peach carmine red eye surrounded by a glistening black red band and on the outer part bright scarlet.

(c). Hookeri. North Hindostan. Stem to 120 cm. high. Leaves 7-13 cm. long. Flowers 5-10 cm. in diameter with three cornered petals, the outer much larger than the inner. Six distinct color forms. At the base of the petal a blue-black spot. There is a double form.

(d). Laevigatum. Persia. Plants smooth; 60-75 cm. high. Leaves on the under side with sparse spreading bristles on the end of the leaf stalk and on the calyx with appressed bristles. Flowers fiery dark scarlet, the petals with black spots surrounded with a silver white band. Outer two petals twice as large as the inner and above forming the round cup of the flower. The top of the capsule often splits open when ripe.

Bailey places these forms under rhoeas and describes them, as follows:

Umbrosum. The fire dragon of some catalogues, dark cardinal with a black blotch at the base of each petal and purplish black anthers.

Laevigatum. Resembles umbrosum but the black spots on the petals are margined with white and the petals are more upright.

Hookeri. Forms a bush four feet high. Flowers 3 1/2 to 5 inches in diameter, from pale rose to bright crimson in color with a white or black spot at the base.

Pavonium. Not mentioned by Bailey but Vilmorin describes as bright scarlet with a cherry carmine eye bordered with a band of glossy black red.

Single:

|            |                 |

| Ranunculus      | "   | "           |

## PETUNIA:

Single Flowered. Most of these varieties are fringed. Flowers up to five inches in diameter, strikingly colored. Here belongs the strain called Giants of California. Ruffled Giants and the various strains given trade names by dealers.

Single Petunia. This is the common mixed striped and blotched and such special varieties with medium sized flowers as

Howard's Star. A strain with medium sized single flowers, crimson or maroon colored with a large white star in the center of the flower. A considerable percentage of the plants from this seed do not come true, reverting to the common single.

Countess of Ellesmere. A charming dwarf, compact growing variety with small flowers produced in great abundance during the entire season. Color dark rose with white throat. This variety is especially fine for massing or for borders.

Rosy Morn. A new variety introduced by Heinemann in 1904. Similar to Countess of Ellesmere but color, solid light rose, a very delicate shade.

Inimitable Dwarf. This is very much like, if not the same as, the Countess of Ellesmere. Thorburn's seed in 1893 gave plants identical with Countess of Ellesmere while seed from Ferry, Burpee and Dreer produced plants with somewhat richer colored flowers of which a part were starred.

Snowball. A compact form with satiny white flowers.

## PHLOX DRUMMONDII:

All of our annual phloxes belong to this species. Habitat Texas. The flowers of the original species were pale purple or brilliant rose red.

The garden forms are numerous and fall into two classes:

(a) Rotundata: those in which the flower has a generally circular outline due to the broad entire overlapping petals. There are half doubles and one full double white. Under this again are subclasses; 1, with flowers 1 1/2 cm. to 2 cm. in diameter; 2, with flowers 2 cm. and upwards in diameter, known as "grandiflora;" plants robust; 3, hortensiaeflora, distinguished by large, close umbels suggesting those of hydrangea. Plants scarce 30 cm. high and mostly with large flowers. Many color sorts as "Triumph". All three of these subclasses have dwarf form.

(b) Stellaria. There are two classes.

f. fimbriata Witten. Middle tooth of petals up to twice as long as the toothed or fringed side teeth.

f. cuspidata Witten. Petals three toothed, the middle one up to five times longer than the side teeth.

*Helianthus*  
HELIANTHUS:

H. annus. Tall coarse plants growing 6-8 feet high, unbranched and crowned with one or more large flowers. Valuable varieties are

Californicus. Very large double orange colored flowers. Nanus fl. pl. (Globe of Gold), dwarf and double, valuable for borders.

Vilmorin divides annus into three groups:

(a) simplex. All large, coarse, single flowers.

(b) tubulosus. Ray flowers absent or only one row. Disk flowers much enlarged and filling the disk fully. f. globosus (Syn. H. ann. var. globosus fistulosus hort.).

(c) ligulosus (Syn. f. fl. pl. hort.). Flowers all ray flowers, the ligules increasing in size from outside toward the center. Varieties are f. major, flowers orange yellow. Seeds smaller and grayer than in the type; f. sulphureus (Syn. f. sulphureus plenus hort.), flowers pale yellow or sulphur yellow. Seeds thinner, smaller and brighter than in the type, f. Californicus. Plants of medium height. Flower heads short stemmed; f. californicus centrochlorus has greenish center to the flower head.

H. argophyths. Closely allied to the annus but with silvery foliage. Constant selection is necessary to keep up the silvery appearance of the foliage.

H. debilis. (Cucumerifolius). This is by far the best and most useful of the annual sunflowers. Plants branching freely, about 3 or 4 feet high and bearing a profusion of small sunflowers all the summer. The flowers are especially good for cutting. Flowers about 2-3 inches wide, bright orange color. There is a strong tendency to variation both in color and shape and size of the rays: In some these are narrow while in others they are wide and overlapping.

H. stella. The best of these varieties but not yet wholly fixed, but more charming for this very fact.

Vilmorin gives H. debilis Nutt. (Syn. H. praecox Engelm. & Gr.) also f. cucumerifolius Torr & Gray (Syn. H. Lindheimerianus Schule).

Germination of seed good for 3-4 years.

## VERBENA:

Verbena hybrida. A race of hybrid annual bedding plants developed from several South American species. The parent species of the scarlet rose and purple colored forms are no longer in cultivation while that of the white is still cultivated as V. teucrioides. Verbenas are most conveniently classified by color; reds, blues, purples, white, striped and yellow, the latter being very scarce and unsatisfactory. The various colors have been well fixed but there are but few named varieties in trade in America. Besides the ordinary mixture there are the so-called "mammoth strains." These forms have been derived from one of the following species:

V. chamaedrifolia, V. phlogiflora (as self colored or scarlet verbenas), V. teucrioides X V. phlogiflora (as auriculaeiflora), or from V. tenera X V. incisa, V. erinodes (as striped or Italian verbenas). They cannot, however, be strictly referred to any one species.

Three groups are recognized based on the height of the plant. In general the auriculaeiflora group is the tallest, the scarlet or self colored next and the striped or Italian the lowest in stature.

Self colored or Scarlet. V. hybrida unicolor. To this sub-group belong many named sorts, as Defiance, also candidissima coccinea, etc., some dwarf compact forms and some "erecta" forms are sometimes recognized but are said to be due solely to local conditions of soil, drought, etc. There are also varieties with yellow foliage.

Auriculaeiflora (Syn. V. hybrida oculata hort.). Flowers bright rose, purple, carmine, blue violet etc., and with a large white or yellowish eye. Varieties are coerulea, nigro-violacea,\* all with a large white eye. There are also specially named varieties that are propagated only by cuttings.

Striped or Italian. The plants in this group grow flatter. Flowers on the same plant may be either striped or self colored.

\* coccinea, cinnabarina, carminea, violacea.

## ZINNIA:

Rather stiff and formal annuals but bringing to the garden a lot of brilliant colors on plants easily grown and blooming a long time. Most of the garden varieties are double forms of Z. elegans. Six types are represented.

Very tall. 2-3 feet or more under good conditions. This form, known as Z. elegans robusta grandiflora plenissima, or in some American catalogues simply as Mammoth has flowers that have attained six inches in diameter under favorable conditions.

Tall Zinnia. 20-30 inches high. This is the common strain available in 12-16 colors. Flowers 2-3 inches in diameter and of various degrees of doubleness and perfection of coloring. Many of the colors are very poor, being foggy and uncertain but some of the reds are exceedingly brilliant.

Medium sized. These are known as dwarfs in the American catalogues, 12-20 inches high and representing the most of the colors found in the tall forms.

Pompom. A dwarf race with very small double flowers borne in great profusion.

Tom Thumb. This represents the extreme type of dwarf Zinnia. A low plant not over 9 inches high with a large flower.

Zinnia Haageana. Color range restricted to orange; plants dwarf. Not as valuable in the garden as Z. elegans varieties.

Vilmorin divides the species in three groups.

(a) simplex. Single, i. e. flower heads with small yellowish or white disk flowers and one or two rows of radiate flowers.

(b) tubulosa (Syn. Z. tageliflora fl. pl. hort.). Flower head with many enlarged disk flowers and with one row (or without any) of ray flowers. Varieties in scarlet red and reddish yellow tints. Is more striking than beautiful but is susceptible of much improvement.

(c) ligulosa (Syn. Z. elegans fl. pl. hort.) (Z. elegans plenissima hort.). Flower head with numerous ray flowers. Disk flowers in the middle few or small. This is the kind commonly grown.

### I. Tall forms.

Tall double. 50-70 cm. high. Flowers 6-8-10 cm. in diameter; 16 color sorts. Robust, double, tall (Syn. Z. elegans grandiflora robusta plenissima).

## ZINNIA (Continued):

Very tall. 60-100 cm. Leaves larger than in the common tall. Flowers 10-13 cm. broad; very double. The color varieties are not yet well fixed (1896).

### II. Semi-dwarf. (Syn. f. pumila fl. pl.; f. nana fl. pl.; f. compacta fl. pl.).

Pretty, bushy forms with good double flowers; eight color sorts.

### III. Dwarf forms.

Liliput. (Syn. Liliput fl. pl.; f. pomponica "Tom Thumb" fl. pl.). 20-30 cm. high; compact with many small, very double flowers 5 cm. across. Many color sorts but these are not yet (1896) well fixed.

Double "Tom Thumb" (Syn. "Tom Thumb" fl. pl. hort). 15-30 cm. high with larger flowers than in the last group. The habit is stiff as in the tall Zinnias, only more so. Lately (1896) a form has been produced with so short a stem that the flowers are borne almost on the ground. This form has been called Z. elegans acaulis.

HENRY A. DREER · PHILADELPHIA · PA.

### MARIGOLD.

The African and French Marigolds are old favorite, free-flowering annuals of easy culture; both are extremely effective. The former have uniformly large yellow or orange-colored flowers, and are well adapted for large beds or mixed borders; the latter are dwarfer in growth, with beautifully striped flowers, and better suited for bedding purposes or for pot culture; they succeed best in a light soil, with full exposure to the sun.

(See also *Calendula* and *Tagetes*.)

MARIGOLD, LEGION D'HONNEUR.

### Two Magnificent Marigolds.

The two varieties offered below were given a trial in our experimental grounds last season, and proved highly satisfactory. They belong to the African type, and grow about 2½ feet high, bearing in continuous succession from early summer till hard frost large and perfectly double flowers.

3084 **Orange Prince.** Flowers very large, of a deep golden-orange. 15 cts. per pkt.

3085 **Lemon Queen.** Immense double flowers, in color a soft lemon-yellow, making a fine contrast to the rich orange of the preceding. 15 cts. per pkt.  
One pkt. each of the above for 25 cts.

3092 **Legion d'Honneur** ("Little Brownie"). A single-flowering Marigold, forming compact bushes 6 inches high. Begins flowering early, commencing in June. The flowers are golden-yellow, marked with a large spot of crimson velvet. (See cut.)..... 10

### AFRICAN VARIETIES.

- 3083 **Pride of the Garden.** Immense flowers, densely double. Color, golden-yellow. A feature of this variety is the compact, dwarf habit of the plant, which forms dense bushes 15 to 18 inches high. .... 10
- 3081 **El Dorado.** Flowers very large, imbricated and extremely double. Colors in all shades of yellow. (See cut.) Per oz., 30 cts. .... 5
- 3082 **Gold Nugget.** Dwarf, dense growth and immense double flowers, of a peculiar shade of golden-yellow. .... 10
- 3090 **Large African.** Tall, double, orange and lemon, mixed; 2 feet; Per oz., 30 cts. .... 5

MARIGOLD ORANGE PRINCE.

AFRICAN MARIGOLD, EL DORADO.

W. ATLEE BURPEE & CO.

## 2022 New African Marigold,—“Lemon-Ball.”

“LEMON-BALL” MARIGOLD,—  
from a Photograph.

The largest and most beautiful of all Double Marigolds. Our crops at FORDHOOK the past season were for months the delight and admiration of all visitors. The painting opposite fails to do justice to the splendid form and exquisite coloring. The extra large flowers are perfectly rounded,—of nearly “ball-like” form; the petals are heavily rolled and are crowded so closely together as to appear laciniated. The color is a clear *canary-yellow*; the brightness of coloring and perfection of form make them resemble large double *Yellow Dahlias*,—only produced so much more abundantly and for a longer season. The plants stand erect, branching freely so that each plant makes a large, slightly rounded bush, two and a half feet high. The rich dark-green foliage provides a suitable background for the charming “Lemon-Ball” flowers. Fine specimen flowers will measure *four inches across*. Single or *en masse* the plants present a most striking appearance in the garden, while the bright flowers are excellent for cutting. As easily grown from seed as the common Marigold, this improved type *should be in every garden*,—if only we had sufficient seed! **Per pkt. 15 cts.**

The illustration herewith has been engraved accurately from a photograph,—but, of course, greatly reduced in size. It will serve to show, however, the wonderfully *perfect form* of the grand double flowers.

## MARIGOLD

J. M. THORBURN & CO.

These, like the Calendulas, are valuable because they light the garden with such a grand glitter of yellow far into the frosts of autumn. The dwarf varieties make a fine border for taller sorts, and both are effective when planted in groups or in garden borders. Hardy annuals. Average height, 1½ to 2 feet.

|      |                      |  |                       |         |
|------|----------------------|--|-----------------------|---------|
| 3154 | African.             | Stronger in growth and larger in flower than the French varieties. The dwarf sorts grow only about 18 inches high and bloom earlier than tall ones. Flowers lemon-yellow, double . . . . . | oz., 40c. . . . .     | pkt., 5 |
| 3156 | “                    | Eldorado. Large, quilled, perfectly double; brilliant shades of yellow . . . . .   | oz., 50c. . . . .     | 5       |

## MIGNONETTE

(Reseda. hA)

Every in- or outdoor garden must have Mignonette in plentiful supply. The seed can be sown at any time, and if successive sowings are made its fragrant, modest colored flowers may be gathered outdoors until November. Sow in pots or boxes under glass in February or March and thin or pot off the seedlings to make good plants for bedding out about April 15. Sow outdoors in rows about April 1, and again regularly at intervals of about three weeks till August, a row or two at a time for succession. The July sowing will make good winter-flowering plants. Average height, 1 foot.

## W. ATLEE BURPEE &amp; CO

## Mignonette. Highly esteemed for its delicate fragrance. It grows most rapidly and produces the largest and finest spikes of blossoms during cool moist weather of early spring and late fall months. A second planting should be made about the first of August to furnish fine spikes of flowers during the cool fall months.

PER PKT.

**2055 Machet.** Thick dark green leaves and numerous stout flower-stalks bearing broad heavy spikes of deliciously scented gray flowers. Per oz.

35 cts., . 5

**2057 Golden Machet.** The flower-spikes have a charming golden-yellow tint. Per ½ oz. 25 cts.; oz. 40 cts., . 5

**2059 Golden Queen.** Large spikes densely set with florets of a light golden yellow; deliciously fragrant. Per oz. 35 cts., . 5

**2061 Allan's Defiance.** Long spikes closely set with florets of largest size and intensely rich perfume. Per ½ oz. 30 cts.; oz. 50 cts., . 10

## D. M. FERRY &amp; CO.,

## Mignonette

A well known hardy annual, producing dense spikes of exceedingly fragrant flowers.

If sown at intervals in spring

and early summer it will bloom till killed by frost. Seed sown in autumn will bloom early in the spring. Thrives best in cool temperature. Hardy annual; one foot high.

**Golden Queen.** Golden yellow, powerfully fragrant. . . . . Pkt. 5cts

**Victoria.** Dark red blossoms, very valuable. . . . . " 10cts

**Crimson Flowered Giant.** Of robust habit with very large spikes of handsome crimson flowers. . . . . " 5cts

**Parson's White.** Flowers almost pure white borne on spikes six inches to a foot in length. . . . . " 5cts

**Dwarf Compact.** Forms a dense, semi-globular bush about ten inches high. . . . . " 10cts

**Tall Pyramidal.** Tall growing; foliage dark green; flower spikes club shaped; large. . . . . " 5cts

**Pyramidal Bouquet.** Forms a dense, short pyramid, the numerous branches being terminated by large spikes of red flowers. Excellent for pot culture and for the open border. . . . . Pkt. 5cts

**Ruby.** A dwarf, compact and vigorous plant producing magnificent coppery red flower spikes. (See Supplement) . . . . . Pkt. 15cts

**Machet.** Of dwarf and vigorous growth, with numerous stout flower stalks, terminated by massive spikes of red flowers. One of the very best for pot culture. . . . . Pkt. 5cts

**Improved Machet.** A highly developed strain; splendid, large, red flower spikes. . . . . Pkt. 10cts

**Reseda odorata grandiflora**, large flowered sweet. . . . . Pkt. 5cts

## VAUGHAN'S

**VAUGHAN'S GIANT MACHET MIGNONETTE.** 890—There is no Mignonette which can equal this, Its flowers are larger in every way than those of other sorts, the spikes are very dense, its foliage is distinct, being crinkly, while its odor is strong and most delicious. The plants grow in handsome bush form and the flower spikes borne on stiff wiry stems. It is the **Best Mignonette** for all purposes, either for pots or for the garden. It is an **Everbloomer**, the flowers lasting until late in the Fall. We supply this sort largely to our florist customers. Our seed is grown with the most scrupulous care and it gives entire satisfaction. Do not fail to get **Vaughan's Giant Machet** for sowing in your garden and another package to sow in pots in June or July to bloom next Winter. **Pkt., 10c.; 3 for 25c.; ½ oz., 40c.; oz., 65c.**

VAUGHAN'S GIANT MACHET MIGNONETTE.

### New Mignonette Machet

#### "White Pearl"

902. Of the vigorous branching Machet type and very free. The long erect stalks carry enormous dense spikes of white flowers which stand well above the undulate foliage and with their white and red stamina form a grand effect. We can recommend this new giant Mignonette as a most valuable novelty. **Pkt., 15c., two for 25c.**

## MIGNONETTE.

(Reseda.)

A well-known fragrant favorite, and no garden is complete without a bed of Mignonette; sowings made in April and again in July will keep up a succession from early summer till frost; can also be grown in pots, for winter and early spring flowering.

3151 **Orange Queen.** Quite distinct color, being a decided orange. Very sweet. 15

2152 **Defiance.** When grown under favorable conditions, spikes will not only be of remarkable size—from 12 to 15 inches long—but deliciously fragrant. The individual florets are of immense size, forming a graceful as well as compact spike. Of extraordinary keeping qualities, retaining their grace and fragrance until every bud opens.

(See cut.) Per oz., 75 cts. 10

3153 **Golden Machet.** Distinct variety of Machet, differing from the type by its massive spikes of golden-yellow blossoms. 10

3155 **Miles' Hybrid Spiral.** Of strong branching habit, with spikes from 8 to 10 inches long; very fragrant. Per oz., 25 cts. 5

3156 **Improved Red Victoria.** Fine spikes of brilliant red. A most useful and desirable variety. 5

3157 **Large-flowering Pyramidal.** Flowers large, of a reddish tint; a good variety for the open ground. Per oz., 25 cts. 5

3158 **Machet.** Well adapted for pot culture; dwarf pyramidal growth, bearing numerous flower stalks; highly colored and very fragrant; one of the best. Per oz., 75 cts. 10

3159 **Goliath.** Many more or less beautiful Mignonettes have been introduced within the past few years, but this new variety is claimed by experts to be the *most beautiful Mignonette in existence*; plants of compact habit, with rich green foliage, the giant trusses of flowers being borne on erect, strong, stiff stalks and surpassing all others in brilliancy of color; especially suited for house culture. 15

3161 **Parson's White.** Large spikes, pure white, very fragrant. Oz., 40 cts. 5

3162 **Salmon Queen.** Strong, robust habit, with fine spikes of bright salmon-red flowers, intensely fragrant; fine for outdoor culture. Per oz., 50 cts. 10

3163 **Sweet-scented (Reseda Odorata).** The old variety with small spikes, but very sweetly scented. Per oz., 15 cts. 50

3169 **Collection** of 10 varieties of Mignonette. 50

HENRY A. DREER · PHILADELPHIA · PA.

MIGNONETTE DEFIANCE.

R. & J. FARQUHAR & CO.

**MIGNONETTE.** *Reseda Odorata*. The most popular fragrant annual, prized as much for forcing in winter as for the summer garden. The seed should be sown early and the plants as they grow thinned sufficiently to allow them to branch. The beds should be liberally watered during dry weather.

- 5065 **GRANDIFLORA, OR LARGE-FLOWERING.** The best form of the old-fashioned sweet Mignonette . . . Lb., 1.25;  $\frac{1}{4}$  lb., .40; oz., .15 .05
- 5067 **ALLEN'S DEFIANCE.** The spikes of this variety, when well-grown, are from 12 to 15 inches in length and they are very fragrant . . . . . Oz., .50 .10

Evans' Boston Giant Mignonette.

Mignonette Machet. No. 5105.

No. 5085. **EVANS' BOSTON GIANT MIGNONETTE.** Pronounced by our leading florists the "finest Mignonette grown," and extensively used throughout the country for forcing. When sown out of doors for summer flowering, it produces spikes of the largest size, and is now the favorite summer Mignonette in Newport and other summer resorts. Oz., \$1.50;  $\frac{1}{4}$  oz., .50; pkt., .25.

**MIGNONETTE — Continued.**

- 5075 **CRIMSON GIANT, OR PYRAMIDAL.** Large spikes of handsome reddish-tinted flowers; very fragrant; one of the best for out-door cultivation . . . . . Oz., .30 .05
- 5080 **COVENT GARDEN VARIETY.** A compact growing sort with large spikes; excellent for pot cultivation; perhaps the sweetest Mignonette . . . . . Oz., .75 .10
- 5100 **GOLDEN QUEEN.** The strongest and most beautiful yellow sort; flowers tinted golden yellow; fragrant . . . . . Oz., .50 .05
- 5105 **MACHET.** The most popular sort for winter culture under glass. It produces large dense spikes of reddish-tinted flowers which are exceedingly fragrant. It is equally valuable for out-door use. Our seed is from a European strain of highest excellence, Oz., .60 .10
- 5110 **MILES' HYBRID SPIRAL.** The flowers are whitish; the spikes usually from 8 to 12 inches in length; very beautiful, Oz., .30 .05
- 5115 **PARSONS' WHITE.** Splendid spikes of whitish flowers; very sweet-scented; excellent for forcing . . . . . Oz., .30 .05

New

## **Machet Perfection MIGNONETTE.**

This improved very large flowering Mignonette is the result of scientific culture and selection by the celebrated French growers, Mess. Machet and Josem, the original introducers of the Machet Mignonette, over which this variety is an improvement. It produces broad, enormous spikes of very fragrant red flowers on strong and graceful stems, dressed with vigorous foliage, evenly branched and of continuous-blooming habit much the superior of its type; one of the best for either garden or pot culture. *Per 1,000 seeds, 30c., Pkt. 10c.*

## **White Machet Mignonette, "PEARL."**

A white-flowered variety of the popular Machet Mignonette, of the same stocky, robust growth, producing in great abundance large, broad, conical heads of deliciously fragrant white flowers. *Per 1,000 seeds, 50c., Pkt. 15c.*

# Burpee's

## Tall or Trailing NASTURTIUMS.

These are all of strong vigorous growth, throwing out running shoots that can be trained upon strings or wires, or can be readily made to climb the ordinary paling fences or wire netting. They are also very showy planted at the top of a steep slope and allowed to run down the bank. They are almost equally beautiful simply trailing on level ground.

A "packet" contains from 30 to 50 seeds; an ounce, from 175 to 225 seeds. You should purchase seed by the ounce and plant liberally,—no flowers grow more easily from seed or are more attractive.

PER PKT.

- 2861 BUTTERFLY (Burpee's).** See illustration. The flowers are very large, measuring three inches across. The color is a light lemon-yellow, showily marked on the three broad lower petals with a blotch of rich terra cotta red. The two upper petals are beautifully marked in shades of bright red, with fine dark lines radiating from the throat. Per oz. 20 cts.;  $\frac{1}{4}$  lb 60 cts., . . . . . 10
- 2863 Dark Crimson.** Deep velvety red, brown, and brownish crimson. Oz. 10 cts.;  $\frac{1}{4}$  lb 35 cts., . . . . . 5
- 2865 Dunnett's Orange.** Deep orange, marked with crimson blotches. Oz. 10 cts.;  $\frac{1}{4}$  lb 35 cts., . . . . . 5
- 2867 Flammeum.** Rich salmon-scarlet, marbled with velvety brown. Per oz. 15 cts.;  $\frac{1}{4}$  lb 50 cts., . . . . . 5
- 2869 Golden-leaved Scarlet.** Golden-yellow foliage; flowers velvety-maroon. Per oz. 15 cts., . . . . . 5
- 2871 Hemisphaericum.** The plants are closely rounded, with very large foliage. Flowers in different shades of orange-salmon and scarlet. Per oz. 10 cts.;  $\frac{1}{4}$  lb 30 cts.; per lb \$1.00, . . . . . 5
- 2873 King Theodore.** Very showy; dark green leaves, with rich velvety-crimson flowers of large size. Per oz. 15 cts.;  $\frac{1}{4}$  lb 50 cts., . . . . . 5
- 2875 MOONLIGHT (Burpee's).** Exquisite light straw-yellow flowers of unusual size, borne in great profusion. Per oz. 15 cts.;  $\frac{1}{4}$  lb 40 cts.; per lb \$1.25, . . . . . 5
- 2877 Pearl.** Pale lemon-yellow,—the nearest approach to creamy white. Oz. 15 cts.;  $\frac{1}{4}$  lb 45 cts., . . . . . 5
- 2879 Prince Henry.** Lemon-yellow, brightly marked with carmine blotches. Per oz. 15 cts., . . . . . 5

PER PKT.

- 2883 Rose.** Bright soft rose. Oz. 15 cts.;  $\frac{1}{4}$  lb 45 cts., . . . . . 5
- 2885 SALMON QUEEN (Improved "Vesuvius").** A magnificent variety with dark green foliage, from which stand out in bold contrast the most showy flowers of a rich but soft velvety shade of salmon. Per oz. 15 cts.;  $\frac{1}{4}$  lb 40 cts.; per lb \$1.25, . . . . . 10
- 2887 Scarlet.** Bright scarlet. Oz. 10 cts.;  $\frac{1}{4}$  lb 35 cts., . . . . . 5
- 2891 SUNLIGHT (Burpee's).** The flowers, of largest size, are most beautifully colored,—clear rich golden yellow. Individual flowers measure nearly three inches across, and are produced most profusely. Per oz. 15 cts.;  $\frac{1}{4}$  lb 40 cts.; per lb \$1.25, . . . . . 5
- 2894 VON MOLTKE.** Large flowers, mostly of a deep rich rosy red, others are of a lighter rosy pink. Per oz. 15 cts.;  $\frac{1}{4}$  lb 40 cts., . . . . . 5

## Nasturtium,—“Tom Pouce.”

This distinct class of *Tropaeolum minus* is a beautiful trailing Nasturtium. The running stems are closely set with small neat leaves, and produce bright little flowers in wonderful profusion. Flowers are yellow, vivid scarlet, and glowing orange tints, many brightly spotted and marbled. It is especially desirable as a trailer for baskets or vases, and also as a pot-plant for winter blooming in the house. **2931 Mixed.** Per pkt. 5 cts.; oz. 15 cts.;  $\frac{1}{4}$  lb. 40 cts.; per lb. \$1.25.

## 2897 “Hybrids of Madame Gunter.”

A most beautiful strain, flowering profusely, and having a wide range of bright and distinct colorings, embracing rose, pink, salmon, scarlet, velvety dark maroon, light yellow, and deep orange in self-colors, as well as most showy striped and blotched varieties. Pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb. 30 cts.; per lb. \$1.00.

## 2899 French Tall Chameleon.

See illustration. Not only are the flowers of various colors produced on the same plant, but these flowers are variously splashed and bordered. On the same plant are found self-colored flowers, some curiously stained while others are broadly banded with light or dark shades. Per pkt. 5 cts.; oz. 15 cts.;  $\frac{1}{4}$  lb. 35 cts.; per lb. \$1.20, postpaid.

# Burpee's New Giant-Flowered Nasturtiums.

Until the introduction of our CAPRICE and SUTTON'S SALMON QUEEN, the only truly giant-flowered Nasturtiums in cultivation were the now famous BURPEE'S SUNLIGHT (see natural-size flower illustrated herewith) and MOONLIGHT. Five seasons ago one of our fields of SALMON QUEEN (*Improved Vesuvius*), from some unaccountable cause, "broke" into several bright colors, principally shades of red, including the most brilliant glowing scarlet. We saved this seed in mixture and have now added to it a suitable quantity of our large-flowered *Caprice* and *Cræsus*, also of *Butterfly*, *Twilight*, *Sunlight*, and *Moonlight*. This makes the most gorgeous and the first truly giant-flowered complete mixture of Tall Nasturtiums. We are sure that it will give great pleasure to all lovers of Nasturtiums who desire to have the greatest variety of colors in the largest-flowering type of these showy flowers. It is an unequalled mixture! Per pkt. 10 cts.; oz. 20 cts.; ¼ lb. 60 cts.; per lb. \$2.00.

2862 "Caprice." The flowers are of extra large size and in a wonderful variety of colors. The petals are heavily marbled with deep velvety tints, showing many unique combinations. Per pkt. 10 cts.; oz. 15 cts.; ¼ lb. 40 cts.; ½ lb. 75 cts.; per lb. \$1.50, postpaid.

2864 *Cræsus*. The ground color ranges from light primrose to deep orange. The two upper petals are blotched with velvety crimson; the three lower petals are heavily fringed at the throat and marked with blotches of brown-red. Per pkt. 10 cts.; oz. 20 cts.; ¼ lb. 60 cts.; per lb. \$2.00.

2874 "Midnight." Plants of extremely deep dark-green foliage. The flowers are a deep brownish red, the soft velvety texture of the petals being crumpled or partially folded. Per pkt. 10 cts.; oz. 20 cts.; ¼ lb. 60 cts.; per lb. \$2.00, postpaid.

2892 Burpee's "Twilight." The flowers are extra large and of full expanded form. They are most pleasing in color, having a faint salmon to buff tint, heavily suffused with rosy salmon. The throat is large and open; the three upper petals are beautifully veined with crimson. Per pkt. 10 cts.; oz. 20 cts.; ¼ lb. 60 cts.; per lb. \$2.00.

2920 Burpee's "Hotspur Harlequin" Nasturtiums. This "Red-spurred" beautiful type of Climbing Nasturtiums. Mixture is a most beautiful for rich brilliancy of colors. Some of the flowers are deep orange, spotted with blood-red; others are creamy white, blotched with orange-scarlet, while there are also bright flowers of a brilliant red, splashed with yellow. The flowers are further ornamented each with a red spur, contrasting beautifully with the dark-colored handsome foliage. While extremely showy if given support upon which to climb, their brilliant beauty is equally as effective if the vines are simply grown trailing on the ground. Per pkt. 10 cts.; oz. 20 cts.; ¼ lb. 60 cts.; per lb. \$2.00.

## New Tall or Trailing Nasturtiums.

2898 "Coquette." In size of flowers, brilliant blending, and diversity of colors on the same plant, "COQUETTE" is a vast improvement over the popular French "Chameleon." Now first offered, this entirely new strain is the result of six years' selection. It should be called "Chameleon," had that name not been already appropriated! Not only do the flowers vary greatly on a single plant, but the plants vary so greatly in bloom from each other that it is almost impossible to find any two that are at all alike! COQUETTE throws every color known in Nasturtiums, but in such diversity of combinations that have not been dreamed of before! We had a number of flowers painted, and only wish we could show this painting to all our friends. The vigorous plants are so profuse in flowering that a hedge or row trailing on the ground will be a source of constant delight all summer long. We recommend every one who can spare the space to plant liberally of this most charming "COQUETTE." Per pkt. 10 cts.; ½ oz. 20 cts.; oz. 35 cts.; ¼ lb. \$1.00; per lb. \$3.50, postpaid.

2866 Fordhook Fashion. The flowers are truly "gigantic" in size and an entirely new color in Nasturtiums! The enormous flowers (often larger than the illustration below of our popular *Sunlight*), of most perfect form, are borne upon long stems well above the foliage. The color is a pure ecru (light crimson-rose), overlaid with a deep veining of old rose; the petals are well rounded and overlap each other. The foliage is a deep blue-green, bringing out the peculiar coloring of the flowers most attractively. A strong rampant grower, it blooms most abundantly. FORDHOOK FASHION is sure to delight and astonish all lovers of Nasturtiums. The seed can be had only in sealed packets (25 seeds each), at retail, direct from us. Per pkt. 15 cts.; 2 pkts. for 25 cts.

# Burpee's Tall "Ivy-Leaved" Nasturtiums.

This new race of Nasturtiums is one of the most distinct novelties that has been offered for years, and yet will succeed anywhere and under the most widely different conditions. They will prove especially desirable as pot bloomers or for planting as trailing plants in window boxes, vases, hanging-baskets, etc., as well as in the flower-bed or as a border row along the garden walks and on the lawn.

Not only is the foliage distinct in its sharp-lobed or pointed outline and light veining like that of the hardy *English Ivy*, but the flowers are a marked departure in form; the petals are quite narrow and set on a very slender foot-stalk, giving the flowers an open star-like effect which is both striking and attractive.

**2944 Ivy-Leaved,—“Spotted King.”** Now first introduced, this has the same running growth of vine and distinct *Ivy-like* foliage as the three described below which were introduced last year. The flowers, produced most profusely, are a deep glowing yellow, splashed and mottled with rich velvety brown. The flowers are deeply fringed at the edges; the calyx and spur are primrose. Sold only at retail in our sealed packets. Per pkt. (of ten seeds) 15 cts.; per pkt. (of twenty seeds) 25 cts.; 5 pkts. for \$1.00.

**2941 Golden Gem.** This variety has light-green foliage, slightly lobed and heavily veined. The flowers are self-colored in a rich golden shade of orange-yellow. The face of the lower petals is about one-half inch wide and lacinated at the outer edge; they are finely fringed where they are joined to the slender foot-stalks. The two upper petals are similar but more slender and flare upward. Per pkt. 10 cts.; oz. 35 cts.; ¼ lb. \$1.00; per lb. \$3.50.

**2942 Flamingo.** This variety has rich dark-green leaves, heavily veined. The flowers are a rich orange-scarlet; the two upper petals are marked with fine brown lines in the throat. The calyx and long spur are golden yellow, and the whole flower has an open or butterfly effect. Per pkt. 10 cts.; ½ oz. 25 cts.; oz. 45 cts.; ¼ lb. \$1.25.

**2943 Fordhook Fancy.** See illustration herewith. The open star-like petals are golden yellow with a rich velvety carmine blotch on each of the three lower petals where they join the slender foot-stalk; in the two upper petals there is a bold and effective stripe of brownish carmine. The foliage is a light green, distinctly lobed and veined.—“*Ivy-like*.” Per pkt. 10 cts.; oz. 35 cts.; ¼ lb. \$1.00; per lb. \$3.50.

**2950 Tall Ivy-Leaved, Mixed.** Now first offered, this mixture is made up in proper quantities of *Golden Gem*, *Flamingo*, *Fordhook Fancy*, and the original *Scarlet Ivy-Leaved*. It is offered at such a moderate price that we trust thousands of our customers will now become acquainted with the rare artistic beauty of this distinct new race. A “packet” contains from 40 to 50 seeds; an ounce from 175 to 200 seeds. Per pkt. 10 cts.; oz. 25 cts.; ¼ lb. 75 cts.; per lb. \$2.50, postpaid.

A Flower and Leaves of the new Tall or Trailing Ivy-Leaved Nasturtium, “FORDHOOK FANCY.”

COPYRIGHT 1903 BY W. ATLEE BURPEE & CO. PHILADELPHIA

IVY-LEAVED NASTURTIUM.

COPYRIGHTED 1900 BY W. ATLEE BURPEE & CO.

## BURPEE'S

### 2940 Nasturtium,—“Ivy-Leaved.”

The plants are of running growth with star-like pointed leaves of rich green, veined with white, so that the young shoots, where the leaves are set quite closely together, have a marked resemblance to the foliage of the hardy *English Ivy*. The flowers are of medium size, intense glowing scarlet in color, and of most distinct form. The petals are quite narrow, and standing well apart from each other present a striking star-like appearance. The IVY-LEAF NASTURTIUM is desirable not only as a bedding variety, but also as a basket or vase plant, where the trailing branches show off the beautiful foliage and star-like scarlet flowers to the greatest advantage. Per pkt. 10 cts.; per oz. 20 cts.; ¼ lb. 60 cts.; per lb. \$2.00, postpaid.

A Single Plant of  
the new dwarf,  
"GOLDEN  
BUTTERFLY,"—  
from a Photograph.

## Burpee's Dwarf Ivy-Leaved Nasturtium,—

**"Golden Butterfly."** A strikingly beautiful bush type of these lovely new Ivy-Leaved Nasturtiums! The plant is a true dwarf in habit of growth, having deep-green leaves of the distinct Ivy-shaped form. The illustration above, from a photograph, shows character of leaves and relative height of plant,—in comparison with the felt hat. These beautiful bushes burst into bloom very early and become quickly covered with bright golden-orange self-colored flowers. The flowers are larger in size than most Ivy-leaved sorts; they are beautifully fringed at edges of the petals and at the throat. So early and continuous-blooming are these neat dwarf plants that, by actual count the past season, a single plant produced as many as two thousand flowers! At a little distance the plants present the appearance of numberless "Golden Butterflies" fluttering upon a bush of Ivy,—hence the name. For table decoration nothing could be handsomer than one of these dwarf plants as a center piece.

2163 **"Golden Butterfly,"** the first of this new race, which is bound to create a sensation in Europe as well as America, is supplied only at retail in our sealed packets. Per pkt. (of ten seeds) 15 cts.; per pkt. (of twenty seeds) 25 cts.; 5 pkts. for \$1.00. ~~As~~ Positively not more than ten of the larger packets (200 seeds) will be sold to any one planter.

## Other Choice New Dwarf Nasturtiums.

2157 **Liliput,—Othello.** Of dwarf compact growth with small foliage, the numerous flowers are of a deep reddish-brown coloring,—so dark and velvety in effect as to appear almost black in the strong sunshine. Per pkt. 10 cts.; oz. 25 cts.; ¼ lb. 75 cts.; per lb. \$2.50.

2130 **Tom Thumb,—Golden Queen.** Of finely rounded form, only six to eight inches high and with small light golden-green leaves, this is beautiful as a foliage plant. The flowers are self-colored in a rich tint of orange-yellow, most intensely bright and glowing. Per pkt. 10 cts.; oz. 25 cts.; ¼ lb. 75 cts.; per lb. \$2.50, postpaid.

2148 **Tom Thumb,—Rudolph Virchow.** Of perfect bust-like growth, the plants are very floriferous. The flowers are of the most attractive soft rosy-pink color that has made the tall *Rudolph Virchow* (offered on page 122) so much admired. Per pkt. 10 cts.; per oz. 35 cts.; ¼ lb. \$1.00.

2151 **Tom Thumb,—Vesuvius.** The flowers are large, of fine form, with large rounded petals and widely open throat. The coloring is similar to that of the tall-growing *Vesuvius*, but even richer. The broad petals are heavily veined with deep salmon-orange. It is certainly one of the very finest large-flowered Tom Thumb varieties, and is most conspicuous on account of its brilliantly colored flowers. Per pkt. 10 cts.; oz. 20 cts.; ¼ lb. 60 cts.; per lb. \$2.00.

## Dwarf Liliput Nasturtiums.

A most charming and distinct new type of very dwarf compact growth that originated from the tall *Tropaeolum Lobbianum*. It retains the brilliancy of color combinations for which the parent stock is noted. Plants are of smaller size than the well-known *Tom Thumb Nasturtium*, growing in closely compact form, while the flowers and rounded light green leaves are also smaller. The flowers are so numerous that they seem to come through the foliage in clusters, embracing many new and beautiful colorings. Sown in a continuous row, these plants are most bright and effective; they are very desirable also for growing singly among other flowers and as pot-plants. 2161 **Finest Mixed.** Per pkt. 5 cts.; oz. 15 cts.; 2 ozs. 25 cts.; ¼ lb. 40 cts.; per lb. \$1.40.

**BURPEE'S**  
**Lobb's Nasturtiums**  
**(Tropæolum Lobbianum).**

Both foliage and flowers of this type are smaller than those of the common Tall Nasturtiums, but the wonderful profusion of bloom and intense brilliancy of colors make it particularly desirable.

PER PKT.

- |   |    |
|---|----|
| <b>2907 Aureum.</b> Extremely showy, with brightest orange-yellow flowers in wonderful profusion. Per oz. 25 cts.; $\frac{1}{4}$ lb 70 cts., . . .  | 10 |
| <b>2909 Brilliant.</b> Dark foliage, with flowers of a glowing scarlet. Per oz. 20 cts.; $\frac{1}{4}$ lb 65 cts., . .  | 5  |
| <b>2911 Cardinal.</b> Foliage of a rich dark purplish shade, and flowers of flaming scarlet. Oz. 15 cts.,   | 5  |
| <b>2915 Crystal Palace.</b> Bright orange-scarlet with bronzy markings. Per oz. 15 cts.; $\frac{1}{4}$ lb 50 cts., . .  | 5  |
| <b>2917 Giant of Battles.</b> Sulphur- or primrose-yellow with suffused rosy markings. Per oz. 15 cts.,   | 5  |
| <b>2919 Gold-Garnet.</b> Very rich orange-yellow with garnet blotches at base of petals. Per oz. 20 cts.,   | 10 |
| <b>2921 King of the Blacks.</b> Rich foliage with flowers of a dark garnet-red. Oz. 15 cts.; $\frac{1}{4}$ lb 50 cts.,  | 5  |
| <b>2923 Lucifer.</b> Both flowers and foliage are of a rich dark coloring, the flowers being a deep rich velvety crimson. Per oz. 15 cts.; $\frac{1}{4}$ lb 50 cts., . .  | 5  |
| <b>2925 Queen Victoria.</b> Deep orange or salmon-scarlet with fine lines in throat. Per oz. 15 cts., .   | 5  |
| <b>2927 Spitfire.</b> Most glowing scarlet; wonderfully profuse in bloom. Per oz. 15 cts.; $\frac{1}{4}$ lb 50 cts., . .  | 5  |
| <b>2929 Triumph de Gand.</b> Light green leaves with quite large flowers of an intense orange-scarlet and faint lines at base; lower petals heavily fringed at throat. Per oz. 25 cts.; $\frac{1}{4}$ lb 70 cts., . . | 10 |

**2926 "Rudolph Virchow."** A very distinct coloring in the popular *Lobbianum* type, having light-green foliage and very bright flowers of a soft rosy-pink coloring, backed with a rich yellow calyx and spur. The coloring is of the same soft glowing tint as seen in the petals of the China Rose. **Per pkt. 10 cts.; oz. 20 cts.;  $\frac{1}{4}$  lb. 60 cts.; per lb. \$2.00.**

**2910 Black Prince.** An unusual novelty of the *Lobbianum* type. While the flowers are not large they are of such an intensely dark, rich maroon as to appear nearly black; the bright golden-yellow stamens make a most showy contrast. The foliage also is so intensely dark that it might be called a black-green. Will attract attention wherever grown. **Per pkt. 10 cts.; per oz. 35 cts.**

# Burpee's

## Choice Varieties of TOM THUMB NASTURTIUMS.

These are of dwarf, compact, rounded growth. As with all Nasturtiums, they succeed best on light well-drained soils or in slightly raised beds where any surplus moisture will rapidly drain away.

A "packet" of *Nasturtiums* contains from 30 to 45 seeds; an ounce contains from 175 to 225 seeds.

PER PKT.

- 2103 Aurora.** Flowers of a rich bright chrome-yellow, distinctly veined with purplish carmine. Per oz. 10 cts.;  $\frac{1}{4}$  lb 35 cts., . . . . . 5
- 2105 Beauty.** Glowing orange with suffused scarlet markings. Per oz. 10 cts.;  $\frac{1}{4}$  lb 35 cts., . . . . . 5
- 2107 Brilliant Yellow.** Flowers of a clear bright yellow with a glossy finish. Per oz. 25 cts., . . . . . 10
- 2109 Bronze Colored.** Flowers of a peculiar burnished bronze color. Per oz. 20 cts., . . . . . 5
- 2111 Cattell's Crimson.** Very dark rich crimson-scarlet. Per oz. 15 cts.;  $\frac{1}{4}$  lb 45 cts., . . . . . 5
- 2113 Chameleon—New French.** Flowers of most diversified coloring, and many brilliant markings on a single plant. The flowers are like those of the *French Tall Chameleon*, but the plant being so dwarf and compact it is even more showy when in flower. Per oz. 20 cts.;  $\frac{1}{4}$  lb 60 cts., . . . . . 10
- 2115 Cloth of Gold.** Compact plants, with bright golden-yellow leaves and brilliant scarlet flowers. It is of great value to plant for bands of foliage in beds. Per oz. 15 cts.;  $\frac{1}{4}$  lb 45 cts., . . . . . 5
- 2119 Crystal Palace Gem.** Rich sulphur-yellow, spotted with carmine. Per oz. 10 cts.;  $\frac{1}{4}$  lb 35 cts., . . . . . 5
- 2123 Deep Scarlet.** A very bright and vivid scarlet. Per oz. 10 cts.;  $\frac{1}{4}$  lb 35 cts., . . . . . 5
- 2125 Empress of India.** Dwarf compact growth, with purplish-green leaves. Flowers dark rich salmon-scarlet. Per oz. 10 cts.;  $\frac{1}{4}$  lb 35 cts., . . . . . 5
- 2127 General Jacqueminot.** Rich dark green foliage; flowers of the glowing crimson-scarlet of the "Jack Rose." Per oz. 25 cts., . . . . . 10
- 2129 Golden King.** Rich glowing orange-yellow. Dark purplish foliage. Oz. 15 cts.;  $\frac{1}{4}$  lb 45 cts., . . . . . 5
- 2131 King of Tom Thumbs.** Glowing scarlet flowers with dark green foliage. Per oz. 10 cts.;  $\frac{1}{4}$  lb 35 cts., . . . . . 5

**Tom Thumb Nasturtiums.**

PER PKT.

- 2133 King Theodore.** Dark foliage and flowers of a rich velvety crimson. Oz. 15 cts.;  $\frac{1}{4}$  lb 45 cts., . . . . . 5
- 2139 Pearl.** Light lemon-yellow, fading to a faint primrose. Per oz. 10 cts.;  $\frac{1}{4}$  lb 35 cts., . . . . . 5
- 2141 Prince Henry.** Straw-yellow, heavily suffused with rose; one of the most distinct and charming. Per oz. 15 cts.;  $\frac{1}{4}$  lb 45 cts., . . . . . 5
- 2147 Ruby King.** Bright ruby-red with a salmon tint. Per oz. 10 cts.;  $\frac{1}{4}$  lb 35 cts., . . . . . 5

NEW NASTURTIUM "QUEEN OF TOM THUMBS."  
Painted from nature at Fordhook Farms.

**2145 Nasturtium,—Queen of Tom Thumbs.** A Most Unique Novelty! Each plant grows in a neatly rounded bush, about nine inches in height and slightly greater in diameter. The light-green leaves grow so closely together as to overlap each other, and each leaf is showily variegated or marbled with silvery white. It comes uniformly true from seed. After the plants have made their growth they produce rather small but rich purplish-crimson flowers, which are shown to the greatest advantage against the background of brightly variegated creamy-white leaves. It is especially desirable to plant as a border (allowing each plant ample room for its full symmetrical development), or to be grown singly in pots for a decorative plant in the window or on veranda. We predict that every lover of Nasturtiums will be delighted with this beautiful and altogether unique novelty. It is a very shy seeder and the seed will always be expensive. Pkt. 15 cts.; 2 pkts. for 25 cts.

## NASTURTIUMS

A marvelous range of new colors has been developed in this favorite flower, which for three or four months of the season makes a better display than almost any other plant. No other annual will produce such a lavish profusion of flowers for so long a time with the same small outlay of time and labor. The maximum of bloom is produced in thin soils, and never flags through the hottest weather. In soils too rich leaves predominate, and the plants are apt to rot off in wet weather, especially if standing too close.

### DWARF, or TOM THUMB NASTURTIUMS

(*Tropæolum nanum*)

These have a neat, compact habit and attractive foliage, are not disturbed by insects, bloom in two months from sowing and most profusely the whole season.

# VAUGHAN'S

**TALL OR  
CLIMBING**

## NASTURTIIUM

The climbing Nasturtiums are ideal ramblers and when pegged down to the ground make a very showy bed. They grow to a considerable height, but will need some attention in the way of tying, as they do not readily adhere to support, being natural ramblers, suitable for stumps, rockeries, low fences or shrubbery. In flower they are showy and profuse and their foliage is always clean and refreshing.

### NEW CLIMBING NASTURTIIUMS.

Price of any of the following: Pkt., 5c.; ½ oz., 10c.; oz., 15c.; except Nos. 1065 & 1066.

**1061—Princess Victoria Louise.** This is surely one of the most beautiful and remarkable varieties of climbing Nasturtiums. The large flowers are cream-white with orange scarlet blotches, the calyx and the spur being of a pure orange-red, which is a rather rare color among the Nasturtiums; sometimes the flowers are edged with red.

**1062—Firefly.** A very distinct sort; foliage rich and dark; flowers rosy salmon, underlaid with bright golden yellow. The petals are beautifully marbled and striped carmine.

**1063—Marguerite.** Very dark foliage with purple stems. Flowers rich deep yellow; striped, blotched and marbled with bright shades of rich brown, orange and carmine. In its varied and showy markings it is almost as remarkable as the Chameleon Nasturtiums described on this page.

**1064—Primrose.** Fine primrose-yellow. Each petal has a small dark brown blotch, and upper petals are lined with the same shade in the throat; the petals are long and narrow, making a loose, open flower.

**1065—Ivy-Leaved.** This is a most distinct variety, differing from all other Nasturtiums in both foliage and flower. The plants are of strong running growth; the leaves are deep rich green, veined with silvery white. The flowers are of the deepest and richest scarlet, comparatively small in size, but of most distinct form, the petals being finely feathered. This New Ivy-leaved Nasturtium is also desirable as a trailing vine for planting in hanging-baskets, vases or for winter pot culture in the house. Pkt., 10c.; ½ oz., 15c.; oz., 30c.

**1066—The Queen.** The flowers when opening are a brilliant salmon-orange, passing into a lighter hue. A very pleasing and pretty kind. Pkt., 10c.; ½ oz., 15c.; oz., 25c.

**1067—Tall Chameleon.** This beautiful new variety has the wonderful property of producing flowers of many distinct colorings upon the same plant. Not only are the flowers of various colors produced on the same plant, but these flowers are variously blotched, splashed, striped and bordered in rich contrasting shades. On one and the same plant are found self-colored flowers, others stained and blotched on a clear ground, while others are broadly edged or banded with light or dark shades.

**1099—Mad. Gunther's Hybrids.** For richness and variety of colors these Hybrids have no equals among Nasturtiums. There are shades of rose, salmon, brightest rose, pale yellow, either as self-colors or spotted and striped. The foliage is mostly dark and contrasts very effectively with the rich colors. They are climbers and continuous bloomers. It is impossible to describe all the different colors, but some of the most striking are as follows: White, shaded carmine on the edges, with deep maroon throat; golden-yellow, shaded brown on edges; yellow, shaded and mottled with carmine; white, with red blotches; shrimp pink, with deep maroon throat; shrimp pink, self-color; rose, bright rose, bright yellow, orange, etc. It contains a great many colors that are not found in any other mixture. Price, large packet, 5c.; oz., 15c.; ½ lb., 40c.; lb., \$1.25, postpaid.

### New Climbing Nasturtium

#### "Black Prince"

**1098.** Absolutely the darkest shade of climbing Nasturtium. The expanding true flowers are of deep blackish purple, deepening later into velvety black. The foliage is also very dark and of bluish lustre, like the Dwarf Nasturtium, Empress of India. It makes most effective pendants, whilst the wealth of bloom renders it eminently serviceable for all kinds of floral decorations, vases, etc. Pkt., 10c.; oz., 20c.

### TALL VARIETIES.

Price, any kind, per oz., 10c.; pkt., 5c.; any 3 for 12c.

**1079—King Theodore.** Rich, deep crimson, dark leaves; most striking variety of its class.

**1080—Edward Otto.** Velvety bronze.

**1081—Hemisphaerium.** Straw color, with rosy scarlet blotches.

**1082—Heinemanni.** Silky bronze, chocolate.

**1083—Tall Pearl.** Cream white.

**1089—Scarlet.**

**1090—Scarlet Striped.**

**1091—Crimson.** Glossy.

**1092—Light Yellow.**

**1084—Tall Prince Henry.**

Flowers light yellow, marbled and striped with bright scarlet; very fine.

**1085—Straw Color.** Distinct.

**1086—Dunnett's Orange.** Golden.

**1087—Schuermani.** Striped yellow and crimson.

**1088—Shillingi.** Bright yellow maroon blotches.

**1093—Von Moltke.** Bluish pink.

**1094—Golden Cloth.** Flowers bright scarlet, foliage golden yellow distinct.

### LOBB'S NASTURTIIUM. Price, any kind, oz., 10c.; pkt., 5c.

They are as easily grown as the common Tall Nasturtium, which they far surpass in brilliancy of their flowers, in height, rapid growth and freedom of bloom. Also very desirable for Winter blooming.

**1069—Asa Gray.** The lightest color of all Nasturtiums; pale sulphur yellow; very delicate.

**1070—King of the Blacks.** Deepest brown.

**1071—Spitfire.** Bright scarlet; very effective.

**1078—Lobb's Nasturtium, Mixed.** All the above and others, Lb., 60c.; ½ lb., 20c.; oz., 10c.; pkt., 5c.

**1073—Giant of Battles.** Sulphur, spotted red.

**1074—Lili Schmidt.** Scarlet.

**1075—Napoleon III.** Golden.

**1076—Cardinal.** Scarlet.

**1077—Lucifer.** Bright, glowing scarlet.

# Dwarf, or Tom Thumb

## Nasturtium, Queen of Tom Thumbs

(Silver Variegated Foliage)

**1052.** This charming novelty produces flowers of a rich bright crimson which forms a very pretty contrast to the silver variegated foliage, and is a strikingly handsome and useful bedding or pot plant, even before coming into bloom; it is very free flowering and produces 90 per cent with true variegated foliage. It is very dwarf and compact, and is a great acquisition as a bedding plant. Award of merit. Royal Horticultural Society. Pkt., 10c., three for 25c.

## NASTURTIIUM LILLIPUT (New) IMPROVED.

**1035—Choice Mixed Colors.** A very special selection of this distinct and free blooming class; each plant forms a small, compact bush, with an immense number of small blooms thrown well above the foliage, and as a bedding plant is far before the Tom Thumb varieties. This selection also contains a much larger number of colors; in fact, as many as thirty or forty shades. The great charm of this novelty is that it throws its bloom so well above the leaves; in fact, in almost a pyramidal form, as it throws up a short stem in center of the plant covered with bloom. Pkt., 5c.; ½ oz., 10c.; oz., 15c.; ¼ lb., 50c.

**1036—Aurora.** Deep chrome yellow, the two lower petals blotched and veined carmine.

**1037—Beauty.** Scarlet, splashed canary.

**1038—Crystal Palace Gem.** Sulphur, maroon spots.

**1039—Empress of India.** A splendid dwarf variety, very dark leaves, crimson flowers. The true dark-leaved sort is scarce.

**1040—Golden Cloth.** Distinct and striking. The foliage is of a bright yellow, while the flowers are intense scarlet.

**1041—King of Tom Thumbs.** Intense deep scarlet flowers, dark foliage; very handsome.

**1042—King Theodore.** One of the best dark red sorts, with dark, bluish-green foliage; a great favorite with florists.

**1043—Golden King.** Brilliant yellow.

**1044—Prince Henry.** The flowers are of a brilliant golden yellow, spotted and marbled with brilliant scarlet, which, in combination with the dark green foliage, presents a striking appearance.

**VESUVIUS.** **1045**—This is the "Tom Thumb" variety of the tall climbing Nasturtium "Vesuvius." It produces dwarf, compact bushes covered with large flowers of a beautiful and brilliant salmon pink, an extremely bright color, showing off well at a distance. Pkt., 10c.; oz., 20c.

**DWARF CHAMELEON.** **1046**—This Nasturtium is a most remarkable advance in this brilliant family. We find that in richness and variety of colors it surpasses any other strain, and is also unique in bearing flowers of quite distinct colorings on one and the same plant—some clear, deep crimson, others blotched on light ground, and others beautifully mottled. This characteristic, as well as the wonderful richness of the unusual markings, has been fixed, and we recommend both strains heartily to every grower of even the smallest garden. Pkt., 10c.; oz., 20c.; ¼ lb., 50c.

**1047—Lady Bird.** The ground color is a rich golden-yellow; each petal is barred with a broad vein of bright ruby crimson.

**1048—Ruby King.** Peculiar blue-tinted red.

**1049—Scarlet King.** Brilliant scarlet.

**1050—Pearl.** Creamy white.

**1051—Spotted King.** A very handsome sort.

**1054—Dwarf Nasturtium.** Mixed. Many colors. Lb., 70c.; ¼ lb., 20c.; oz., 10c.; pkt., 5c. Postpaid.

## PETER HENDERSON & CO.

## NEW IVY-LEAVED NASTURTIIUMS

A new class, of compact climbing habit, growing about 6 to 8 feet high, with thick green-lobed leaves resembling those of the English Ivy. The flowers, which are borne in greatest abundance throughout the season, are of medium size and peculiarly cut and fringed, giving them an airy butterfly effect; very desirable for training over trellis, rockwork, vases, etc.

**Ivy-Leaved Golden Gem.** Golden-yellow flowers. Pkt. 15  
 " **Flamingo.** Orange-scarlet. 15  
 " **Fancy.** Cream and yellow, splashed red. 15  
 " **Collection,** 1 pkt. of each of the above 3 varieties. 40

**California.** A new, giant-flowered variety, bearing enormous flowers with a deeply fringed throat; the color, a rich crimson-maroon, is strikingly rich and velvety, contrasting vividly with the yellow calyx and spur; the foliage is deep blue-green. It is a strong, healthy grower and easily leads all other sorts in its free-flowering qualities and the enormous size of its flowers. Pkt. 10

**Twilight.** Chamois-yellow, shaded with salmon-rose and splashed scarlet. 10

**Sunlight.** Pure, rich, butter-yellow flowers, often 3 inches across. 10

**Moonlight.** Immense creamy-white flowers. 10

**Jupiter.** Magnificent flowers of a brilliant golden-yellow. 10

**Ruby-Rose.** Distinct ruby-rose shading off into lighter and darker tints. 10

**Salmon Queen.** Grand flowers of glowing salmon color. 10

**Red Spur.** A beautiful type, with large flowers of different colors, blotched and spotted; some with red edges, etc., and all flowers are further ornamented with unique red spurs. 10

## GIANT-FLOWERING TOM THUMB NASTURTIIUMS

These Grand Bedding Nasturtiums have been developed through years of careful hybridization, culture and selection under conditions thoroughly congenial to the highest development of this popular garden annual. Not only have the flowers increased wonderfully in size, often measuring three inches across, but a great variety of new and charming combinations of colors has been produced, while the brilliancy and velvety richness of the self-colored sorts have been greatly enhanced. For summer flower-beds nothing can surpass them; the plants form perfect mounds about one foot high by one foot across. Seed sown in the open ground in the spring will produce plants that commence blooming during early summer and continue until severe frosts. (See cut.)

**Mariposa.** Light yellow with terra cotta-red blotches and bright red veins. Pkt. 10

**Golden Gate.** Immense flowers of rich golden-orange. 10

**Kaleidoscope.** The flowers vary in color on a single plant; some being all yellow, others all red, while many are spotted and marked in diversified styles. 10

**King of the Reds.** Giant flowers of brilliant crimson-scarlet. 10

**Rainbow.** Canary-yellow, splashed, marbled and shaded with carmine and rose. 10

**Gorgeous.** Grand flowers of glowing salmony-apricot. 10

**The Collection,** 1 pkt. each of the above 6 Giant-Flowering

**Silver Queen.** A Tom Thumb Nasturtium of round, compact form; foliage beautifully mottled green and silver against which the scarlet flowers contrast vividly. Pkt. 25

## NEW HARDY ANNUAL *Nicotiana Sanderæ*

Awarded a unanimous First-class Certificate of the Royal Horticultural Society; also the Silver Banksian Medal, and the Gold Medal of the Royal Horticultural Society. Awarded, also, First-class Certificate by the National Society of Horticulture of France.

NEW HARDY ANNUAL, NICOTIANA SANDERÆ

This plant is claimed to be the most valuable hardy annual introduced in the past half century. It is the result of a cross between *Nicotiana affinis* and a species discovered a few years ago in Brazil. The extreme floriferousness of the plant is shown by our illustration, while its brilliant carmine color is shown on the back of this catalogue. The originators describe it as follows: "*Nicotiana Sanderæ* bears large, brilliant carmine-red flowers on bushy, freely branching plants 2 feet high; the shape of the flower resembles that of *affinis*, but has a short, stout tube; it comes true from seed. Plants raised in spring in the same manner as any of the hardy annuals flower in May, give a continuous display of bloom all the summer and autumn in the open ground, and make extraordinary branched specimens, retaining their leaves to the base. Among *Nicotiana* we know nothing approaching it in point of floriferousness, nor in its graceful and copiously branching habit. The whole plant is laden with flowers from base to summit—literally ablaze with most handsome carmine-red blossoms. Its combined hardiness and character of producing flowers

continuously under all circumstances in every kind of soil and situation are undeniable recommendations, and we certainly know of no plant that produces such an abundance of blossoms for the little care that it is necessary to bestow on it. It possesses all the best qualities of *Nicotiana affinis*, but bears myriads of lovely calanthe-like blossoms and is decidedly much more branching in habit, and of far greater floriferousness than any other *Nicotiana*. Although the scent of *N. Sanderæ* is not so powerful as that of its white parent, it yet possesses a decidedly sweet odor. This hardy plant, with its rosy carmine flowers, produces a startlingly beautiful effect, and is charming either in flower beds, shrubbery borders, or in the wild garden, whether in the background or in the open. It should be sown in January, pricked out, and transplanted in May in the position where it is intended to flower." Pkt. 25 cts., 5 pkts. \$1.

### **VAUGHAN'S**

#### **The New Tobacco, "White Wonder"**

*Nicotiana Mirabilis Alba*

**1107.** This new Tobacco plant is the cross between *Nicotiana Sylvestris* and *N. Affinis*. It is a tall grower, from 4 to 6 feet high, with large glossy upright leaves, measuring from 12 to 18 inches in length. The spikes are tall and the drooping white flowers are produced from May until frost. They are pure white, 1½ inches across, the tube is 6 inches long, and the flowers are as fragrant as those of *N. Affinis*. It surpasses this variety in neatness of growth and has a much more beautiful foliage. We purchased the entire stock of this new Tobacco Plant from the originator, Dr. Van Fleet. **Pkt., 15c; 2 for 25c.**

# BURPEE'S DEFIANCE PANSIES

## Pansies,—Continued.

The Pansy is, without doubt, the most popular of all plants. They bloom most freely and produce the largest and finest flowers in cool moist locations, or during early spring and late fall months. They flower freely, however, even during the hottest and driest summer, from seed sown in open ground early in spring, and continue in bloom until checked by severe frosts of early winter.

Our Complete LEAFLET on Pansy Culture will be sent **Free**,—if requested with an order for seed.

IMPROVED GIANT TRIMARDEAU PANSY.

- PER PKT.
- 2191 Improved Giant Trimardeau.** Remarkable for extra large size of the flowers; mostly marked with three large blotches or spots. Per 1/4 oz. 50 cts.; oz. \$3.50. . . . . 10
- 2193 Odier.** Superb flowers, beautifully blotched. Per 1/4 oz. 50 cts.; oz. \$3.50. . . . . 5
- 2195 Cassier's Giant Odier.** Flowers, of immense size, are all *three-spotted* or *five-spotted*. Per 1/4 oz. 75 cts.; oz. \$5.00. . . . . 10
- 2197 The Bugnot Pansies.** The petals are blotched after the manner of *Cassier's Giant Odier*, but the color radiates on the margin of the petals. 1/4 oz. 75 cts.; oz. \$5.00. . . . . 10
- 2203 Quadricolor, or Pheasant's-Eye.** Upper petals sky-blue, edged with violet; the lower petals are marbled. 1/4 oz. 50 cts.; oz. \$1.50. . . . . 5
- 2205 Prince Bismarck.** Shades of brown and golden bronze, marbled. 1/4 oz. 40 cts.; oz. \$1.25. . . . . 5
- 2207 Snow Queen.** Flowers of a pure satiny white. Per 1/4 oz. 40 cts.; oz. \$1.25. . . . . 5
- 2209 King of the Blacks, or Faust.** Almost coal-black. Per 1/4 oz. 40 cts.; oz. \$1.25. . . . . 5
- 2211 Lord Beaconsfield.** Purple-violet, shading off in the top petals to a white-blue. Per oz. \$1.25. . . . . 5
- 2213 Emperor William.** Ultramarine-blue with violet eye. Per 1/4 oz. 40 cts.; oz. \$1.25. . . . . 5
- 2217 Striped and Mottled.** 1/4 oz. 40 cts.; oz. \$1.25. . . . . 5

with deep violet spots on each of the . . .

**2319 GIANT PRESIDENT McKINLEY.** Rich glowing yellow, each petal blotched with deep reddish brown, shaded with violet markings.

**2321 GIANT PRESIDENT CARNOT.** Similar to preceding in large size, but the margin of petals is a clear white, while centers are heavily blotched with rich violet-blue.

## Madame Perret, or "Phenomenal" Pansies.

Flowers of the largest size, full rounded form and most beautiful colorings. The three lower petals are generally of canary-yellow, white, or rose-pink, heavily blotched and veined with velvety colors, such as rich purple, rose, and crimson, while the large upper petals are either self-colored in bright red and deep purple, or these dark rich shades are distinctly outlined with a narrow margin of silvery white.

**2329 Finest Mixed Colors.** Per pkt. 15 cts.

## Imperial German Pansies.

The following are each **TEN CENTS** per packet.

- 2243 Black Prince.** Magnificent; the rich glossy black has a peculiarly soft velvety appearance.
- 2247 Cardinal.** Brilliant brownish scarlet, the lower petals marked with a dark brown blotch.
- 2249 Crown Prince.** Of a deep velvety black, with well-defined rich golden-bronze face.
- 2251 Dark Mahogany with White Margin.** The darkest mahogany, edged with pure white.
- 2252 Dark Mahogany with Yellow Margin.**
- 2254 Deep Yellow.** Very rich; spotless.
- 2256 Emperor Frederick.** Velvety brown, shaded by a narrow band of deep golden yellow.
- 2259 Emperor William, Improved.** Always true.
- 2261 Fairy Queen.** Delicate azure-blue, margined with a clean-cut border of pure white. The flowers are of good size, circular-form, of fine substance, and borne abundantly.
- 2263 Fire King.** The three lower petals each have a large blotch of magenta, margined with yellow, while the upper petals are of a bright reddish brown of a *really fiery shade*.
- 2265 Jet Black.** (Dr. Faust, or Black Knight.)
- 2271 Large-Spotted, Mixed.** Superbly spotted or blotched on the three lower petals.
- 2273 Marbled, Mixed.** Beautifully marbled.
- 2275 Meteor.** Bright canary-yellow; the three lower petals are spotted with mahogany-brown, while the two upper petals vary from reddish brown to dark purple, margined with gold or silver.
- 2277 Odier, or Five-Spotted.** Of unrivaled beauty; each petal has a large blotch, with clearly defined margin of a contrasting color.
- 2279 Peacock.** The lovely ultramarine-blue resembles this color in the feathers of a peacock.
- 2283 Red Riding-Hood.** Shades of brilliant red.
- 2285 Rosy Morn.** This is a beautiful rosy-red color, with a distinct white edge.
- 2289 Snow Queen.** Spotless white.
- 2291 Ultramarine-Blue.** Beaconsfield improved.
- 2293 Victoria Red.** The flowers are throughout of a beautiful rich deep red color.
- 2294 Splendid Mixed.** See breeding page.

## PANSIES.

- 5855 FARQUHAR'S FINEST SHOW STRAIN, MIXED. Large round flowers of perfect form and massive texture, embracing the finest colors and markings in great variety. Oz., \$12.00; ¼ oz., \$3.50; ⅛ oz., \$2.00; pkt. of about 250 seeds, .50; No. 5860. Pkt. of about 100 seeds, .25.
- 5865 BUGNOT'S PRIVATE STRAIN. This is the finest strain known; the flowers being of perfect form and richest colors. It should be grown under glass to bring its fine qualities to perfection. Our seed is saved for us each year by M. Bugnot in France. Finest mixed, 1,000 seeds, 5.00 1.00
- 5870 BUGNOT'S LARGE BLOTCHED. Finely formed flowers of rich and varied colors; mixed . . . . . Oz., 8.00 .25

- 6088 WHITE . . . . . " 1.25 .10

## PETER HENDERSON & CO.

### Henderson's Mammoth Parisian Pansies.

THE Parisian Pansies are distinguished by their magnificent and varied colors and strong markings. There is usually a large "blotch" on each of the five petals, with a surrounding band of some strikingly contrasting color, over all of which is thrown a cobweb-like netting of yet another hue. The combinations prevailing are composed of shades of cinnamon, violet, canary and orange-yellow, black, garnet, light blue, indigo, cream, etc. These pansies have been brought up to a high standard of excellence, the flowers being of fine substance, perfect shape and of mammoth size, measuring, when properly cultivated, four inches across. A large number of these pansies are also very fragrant. **Mixed Colors.** Per 1,000 seeds, 75c. . . . . Pkt. .25

### Henderson's Giant Mottled Pansies.

A DISTINCT new type of Pansies of greatest merit. The flowers are of giant size and are borne in profusion—well-grown they measure 3 to 3½ inches across—and of most gorgeous effects, blotched, spotted, marbled, veined, striped and blended, colors passing through reds, rose, pink, white, purple, in beautiful and indescribable variegation. *These pansies were awarded a prize at the Paris Exposition.* **Mixed Colors.** Per 1,000 seeds, 75c., Pkt. .25

- 3303 **Giant Orchid-flowered Mixed.** A splendid and quite distinct new race showing remarkable combinations of all colors, including shades of ch mois, terra-cotta, pink, orange, etc. 25

HENRY A. DREER 'PHILADELPHIA PA'

PANSY, PSYCHE.

3472 One of the most beautiful Pansies that has ever come under our notice. The plants are perfect in habit and very free-flowering; flowers of the largest size, with five velvety-violet blotches, relieved by a broad margin of white; the edges of the petals are elegantly waved. 20 cts. per pkt.; 8 pkts., 50 cts.

## NEW PANSIES

"MASTERPIECE" TYPE.

### 1125—Masterpiece—New Giant Curled.

This strain comes nearer to Double Pansies than anything ever introduced under that name. In reality the number of petals is the same as that in other Pansy flowers, but they are crimped and curled in such a fashion that the flowers appear double. The flowers are of enormous size, often 3 inches across, and the color variations and combinations are odd and striking. Pkt., (200 seeds), 20c.; 3 for 50c.

**1126—Psyche.** Each flower is elegantly curled and undulated and in every respect a beauty in form and color. The characteristic five velvety violet blotches or eyes are surrounded by a broad white edge. Comes true from seed. Pkt., 20c.

**1127—Bridesmaid**—The flowers of this new interesting variety are very large and of fine form. Its ground color is a rosy white, rivaling in delicacy and beauty the finest Apple-blossom, and most strikingly setting off the dark blotches of the center. It is the freest blooming of the Giant Pansies. Pkt., (120 seeds), 10c.

### New Pansy "Rosy Morn"

**1157.** The color of this new Giant-Flowered Pansy is a bright purplish crimson margined with a clear white edge. In early spring the color is very deep and rich; as the weather grows warmer the color gradually turns a pleasing rosy carmine and the silver edge becomes wider. Flowers large, good substance. Pkt., 15c.

## Vaughan's Giant Pansies

**1132—"Adonis."** Color a magnificent light blue with a white center which sets off the dark blotches on the petals in a most striking manner.

**1133—President Carnot.** The ground color is white and each petal is almost covered with a deep, rich velvety blotch, leaving a broad white margin.

**1134—Mad. Perrett.** Edge of petal is frilled. The colors are of dark wine, pink and red, beautifully veined and all with a white margin.

**1135—Cassier.** This is a very fine mixture of Pansies marked with three or five blotches on rich backgrounds. The flowers are very large, round and borne on stiff stalks. This mixture contains a great many red shades.

**1136—White.** Flowers often 3 inches in diameter, pure white with a large violet blotch on the three lower petals. (See above for kinds not priced.)

**1137—Beaconsfield.** This is a great favorite on account of the rich combination of purple and lavender, shading to white towards the top.

**1138—Yellow.** A beautiful clear yellow, heavily blotched on the lower petals.

**1139—Purple.** Of deepest royal purple known. Pkt., 5c.

**1140—Emperor William.** Splendid ultra-marine blue with purple eye.

**1141—Auricula Colors.** Beautiful shadings of copper and mahogany colors

**1142—Coal Black.** A jet black of truly giant size.

**1143—Copper Color.** Rich metallic shades.

**1144—Aurora.** Flowers large, color pure white without blotches.

**1145—Golden Queen.** Clear golden yellow with a few dark pencillings in center.

**1147—Fairy Queen.** This is one of the prettiest of the large flowering Pansies. The flowers are of the loveliest sky-blue with a fine silver border. Pkt., 10c.

**1149—"Freya."** Color, rich deep purple violet with a broad white margin which shows just as distinctly on the back of the petals.

**1150—President McKinley.** The ground color is golden-yellow, while each petal has a large blotch of dark violet leaving a clear golden-yellow margin.

**1151—Violet Blue.** Of immense size and of rich velvety texture.

**1152—Fancy Striped.** The flowers are striped and mottled in various tints.

**1153—Bugnot.** Its flowers are of enormous size and circular form; the petals are of great substance and velvety appearance, each one bearing a large, deeply colored blotch that runs out in delicate veins to the edge; the shadings comprise tints of red, bronze and brown not found in any other mixture. Pkt., 15c.

**1154—Mammoth Butterfly.** The flowers are very large, of good form and substance and produced freely. In coloring they are varied, seldom two alike in a hundred plants. They are mottled and spotted, streaked and splashed while the colors are mainly those rich wine reds, chocolate, velvety red-brown, lavender, violet and purple shades which are only found in a Pansy blossom. Per pkt. of 250 seeds, 10c.

**1155—Paris Pansy Mixture.** Thousands of these Pansies are sold daily in the Paris markets. The flowers of this strain are as large as the Trimardeau and far superior in color and substance of petals; blotches are more conspicuous.

## PETUNIA HYBRIDA

(hhA)

Once fairly started, the Petunias grow almost as easily as weeds and furnish a glorious succession of bloom from early summer until frost. The Large-flowered strains are very beautiful and of almost endless variety. Seed of the Double and Giant-flowered Petunias is made expensive by the great amount of labor involved in hand-fertilization, and it is well to handle seed and tiny seedlings with some care. Sow in hotbed, coldframe, or in boxes of fine soil in the sunny windows of a warm room in April or May, and transplant about a foot apart in garden beds. Seed of the double varieties has not so much vitality as that of single sorts and needs a little more care in watering to be sure of germination. We have no better plants than the Petunias for beds and masses, borders, window-boxes, baskets and vases. They will grow in almost any soil and bloom profusely through long droughts. The newer varieties are of brilliant colors.

**SINGLE LARGE-FLOWERED.** These have flowers 4 or more inches across. Our strains are superb, and the collections offered contain only the finest varieties. Average height, 1½ feet.

| Superbissima mixed.                                       | The flowers are of immense size, superbly colored and the open throats are beautifully veined. We have carefully compared other strains sold as Giants of California, etc., and have found none superior and most of them not equal to our strain of this magnificent variety. (See Supplement) . . . . . |
| Brilliant Rose.   | Exceedingly large, beautiful flowers of the brightest and yet delicate rose color. One of the finest varieties in cultivation and comes true from seed. . . . .   |

**General Dodds.** This is a strain of petunia producing large, single flowers that are noticeable because of their exceedingly rich, dark purple color, which is really one of the most striking among petunias. We recommend General Dodds as a vigorous and very persistent bloomer and think there are very few garden plants that will make so good and satisfactory a display . . . . .

Pkt. 10cts

Petunia Ruffled Giants. No. 6443.

No.

Pkt.

## PETUNIAS — Continued.

- 6443 RUFFLED GIANTS. A Californian strain producing large flowers having the edges deeply ruffled or fringed. They are of fine substance with deep wide throats and vary in their colors from pure white to dark purple-violet; many of them being beautifully striped or veined . . . 1 $\frac{1}{2}$  oz., 3.00 .50

HOWARD'S STAR PETUNIA,  
as grown at Fordhook.

- 2434 Petunia,—Howard's New Star. Each flower shows a large distinct five-pointed white star on a bright crimson or purplish-crimson ground. The rays of this star are distinct in form, as they start in a narrow point at the throat and broaden at the center and are again pointed at the edge. About eighty per cent. of the plants come true from seed. Late in the fall when the weather becomes cooler, the edges of the white star become feathered with fine lines of rose and crimson, while in other flowers the white portion is suffused with soft rose. The plants begin to bloom early and flower freely until late in the fall. Per pkt. 10 cts.

## W. ATLEE BURPEE &amp; CO.,

2432 Burpee's  
"Baby-Blue."

See illustration. Owing to its dwarf compact growth this is one of the most satisfactory plants to grow in solid masses. It begins to bloom when only a few inches in height and flowers profusely until plants are killed by frost.

The flowers measure only from one to one and a half inches across, and are a soft reddish purple in color when examined closely, but when seen *en masse* in strong sunlight from a little distance appear a lovely blue. The small pure white throat shows as a small white circle in the center of the flower, but this does not affect the solidly blue coloring,—except on close examination. The small very dark green leaves form an admirable background for the flowers. Per pkt. 10 cts.

"BABY-BLUE."

COPYRIGHTED 1903 BY  
W. ATLEE BURPEE & CO.

PETUNIA—HOWARD'S STAR

## The Howard Star Petunias

1254. Their ground color is a dark crimson maroon, with a rich velvety texture. Showing through the ground color are violet veinings. From the center starts the points of a five-rayed star, which broadens half way up, narrowing to a point at the margin of the flower. This star is a very light blush pink, almost white, which deepens in color as it reaches the margin and finally blends with the maroon ground color. The plants are free growers, branching freely and attaining an average height of 18 in. by 24 in. in diameter. They are remarkably prolific bloomers, single plants often having 50 fully expanded flowers at a time Pkt., 15c., two for 25c.

## New Large-Flowering Petunia

## "Painted Lady"

1267. This is a most remarkable and charming sort. The flowers are of medium size, about 3 inches in diameter, beautifully frilled and fringed, and produce the most pleasing color combinations of white, pink and rose. Some of the flowers are rich rosy pink, almost cerise, others soft apple-blossom pink, others are pink with a clear white margin, some are starred, others flamed and streaked. Some plants have white, blush and rose colored flowers. Pkt., 50c.

**FRINGED PETUNIAS.**

**Petunia Rosy Morn.**

3566 Petunias are one of our most effective summer-blooming plants, and this new variety is probably the most striking yet introduced. It belongs to the small free-flowering section, and forms nice bushy fairly dwarf plants, which are covered from early summer till hard frost with brilliant carmine-pink flowers, with white throat and centre. For beds, baskets, vases and the many other uses to which the Petunia lends itself, this is sure to prove attractive. 20 cts. per pkt.; 3 pks., 50 cts.

HOWARD'S STAR PETUNIAS.

**SINGLE VARIETIES.**

- 3564 **Howard's Star.** A beautiful free-flowering strain, color crimson maroon with a clearly-defined five-pointed star of blush-white. For bedding, baskets, vases, etc., this is exceptionally fine; 2 pkts., 25 cts. .... 15
- 3565 **Brilliant.** A beautiful and effective variety of compact growth, flowers of a brilliant carmine pink; 2 pkts; 25 cts. .... 15
- 3561 **Dwarf Inimitable.** "Star Petunia," compact-growing variety, flowers cherry-red with a white centre .... 10
- 3562 **Snowball.** A fine compact variety, producing its pure satiny-white flowers throughout the entire season. .... 10
- 3563 **Pure White.** Desirable for cemetery beds, or where large masses of white are wanted. Grows 12 to 15 inches high. Where a more compact sort is wanted, we recommend "Snowball." .... 10

PETUNIA ROSY MORN.

## PHLOX DRUMMONDII, ETC.

(Flame Flower)

**GRANDIFLORA.** This section has beautiful, round-petaled flowers, larger than in the older sorts. Showy and constant.

When opening, the flowers are of a brilliant salmon-rose, changing into a lighter rose toward the center and with a bluish center.—a rare and unique coloring. The plants are of medium height and extremely hardy and free-blooming. Pkt. 25 cts.

**VAUGHAN'S****Phlox Morning Star**

(Phlox Dr. Nana Compacta Radiata.)

1311. An entirely new and distinct class in respect to the peculiar shape of the flower petals. These unite in the form of a five or six-pointed star, as shown in our illustration. The blooms are rich carmine-red, with two white stripes on each petal. The plants are dwarf and very free, forming compact bushes literally covered with the charming flowers. Pkt., 25c.

## POPPIES.

A great advance has been made in recent years in the development of the Poppy, which has brought it into deserved popularity, and it may be safely said that no other flower produces a more brilliant display of color during the blooming period. Annual Poppies should be sown as early in the spring as possible where they are to remain, as they do not stand transplanting.

### SINGLE ANNUAL POPPIES.

## W. ATLEE BURPEE & CO.,

**Poppies.** Hardy annuals of quick growth and producing a wealth of the most gorgeous blooms. Seed should be sown early.

PER PKT.

- 2481 **Golden Gate.** See illustration. Both self-colored and striped, blotched, and bordered, on single, semi-double, and double flowers, making an effect of wondrously varied beauty. Per oz. 50 cts., 5
- 2483 **Shirley Poppies.** The colors range through all shades of delicate rose, pink, carmine, and brilliant crimson. Many of the large single flowers are edged with white. Per oz. 50 cts., 5
- 2485 **Tulip Poppy.** The glowing scarlet is like that of the superb *Duc Von Thol Tulip*, . . . . . 5
- 2487 **Burbank's Silver Lining.** Cup-shaped single flowers, rich scarlet, spotted with black, but each spot appears to be covered with a shield of white tissue paper; altogether unique, . . . . . 10
- 2489 **Fire Dragon (Papaver lævigatum).** Large single flowers of the most brilliant deep scarlet, . . . . . 5
- 2491 **Double Dwarf Japanese.** Plants of compact bushy growth, only ten inches in height. The flowers are extremely double, in deep glowing shades of red and scarlet, either self-colored or with edges bordered with silvery white, . . . . . 10
- 2493 **Burpee's Fairy Blush.** The globular flowers measure from ten to thirteen inches in circumference; the petals are elegantly fringed and pure white, distinctly colored at the tips with rosy cream, 10
- 2494 **Burpee's "Shrimp-Pink."** Extra large extremely double flowers with petals finely fringed. A most delicate tint of flesh or soft rosy pink, with a lighter shading at the ends of the feathery petals, . . . . . 10
- 2495 **Fordhook Fairy Poppies.** Perfectly double, of large size and magnificent form; pure white, glowing scarlet, light lilac, scarlet with white and black, rose, and deep maroon. Per oz. 35 cts., . . . 10
- 2497 **The Mikado.** Of pure white and brilliant crimson-scarlet; large double flowers of quaint artistic beauty, with petals deeply cut and fringed, . . . . 10
- 2499 **Cardinal.** The plants grow about sixteen inches high, with deeply cut dark green foliage; enormous double glowing cardinal-scarlet flowers, 10

PER PKT.

- 2501 **Snowdrift.** A grand variety. The large pure white flowers are perfectly round and double, . . . 5
- 2503 **Somniferum (Opium Poppy).** True, gigantic white single flowers. Oz. 10 cts.; lb 90 cts., 5
- 2505 **Improved Double Carnation, Mixed.** Flowers of dazzling richness and variety of colors. Per oz. 20 cts., . . . . . 5
- 2507 **Double Pæony-flowered, Mixed.** Splendid large double flowers of all colors. Per oz. 20 cts., 5
- 2509 **FORDHOOK FINEST DOUBLE.** This new mixture is made by ourselves from choicest varieties as grown at FORDHOOK FARMS. It contains seed of *Fairy Blush*, *Cardinal*, *Mikado*, *Snowdrift*, *Fordhook Fairies*, and many others,—all distinctly double flowers of finest type. Per oz. 35 cts., 10

## HENRY A. DREER · PHILADELPHIA · PA. THE GOLDEN POPPY.

3716 In this novelty we have a distinct break from existing sorts. The golden foliage of the plants in the young state look exactly like the well-known *Pyrethrum aureum*, or Golden Feather, and are quite ornamental from the start. After the flowers are produced, which are quite double and of various red shades, the effect is very novel. The plants grow about a foot high, and the flowers are thrown well above the golden foliage. As easy to grow as an ordinary Poppy. 15 cts. per pkt.; 2 pkts., 25 cts.

## W. ATLEE BURPEE & CO.,

### 2484 Poppy,—White Shirley.

The close compact plants grow about eight inches in height, throwing up numerous slender flower stems fifteen to twenty inches in height, each crowned by a graceful flower of the most delicate texture and purest snowy whiteness. The flowers range from single to semi-double. This new pure white-flowered poppy is a charming acquisition. Per pkt. 10 cts.

# **PETER HENDERSON & CO.**

SINGLE POPPY, MAJESTIC.

## **Dolly Varden or Double Shirley Poppies.**

A strain of double and semi-double annual Poppies of remarkable beauty. The plants are sturdy; bushes about 15 inches high, producing myriads of exquisite crushed satin-like flowers, about 3 inches across, of the most charming combinations of coloring; exceedingly effective for garden beds. **Mixed Colors.** Per 1,000 seeds, 25c. . . . . Pkt. 10c.

## VAUGHAN'S

VAUGHAN'S NEW POPPY "SANTA ROSA."

### The "Santa Rosa"

#### Vaughan's New Poppy

*Our growers, who sow Poppy seed by the acre, say:—Your "Santa Rosa" is an exceptionally fine mixture of Shirley Poppies, by far the best we have seen.*

**1346.** We introduced this famous new Poppy last season, having purchased Mr. Burbank's entire stock of the same. It is a new strain of Shirley Poppies, originated and improved by Luther Burbank, the great horticulturist. We have named "Santa Rosa," after the producer's California home. This new strain combines all the delicate beauty in color of the original Shirley and Shirley types, and with these the whole flower in all of its petals is beautifully crimped as illustrated above.

Few garden flowers excel the poppy in popular favor. Its freedom of growth, beauty and lovely showiness make it an ideal garden flower. **Pkt., 10c.; ½ oz., 25c.; oz., 40c. ¼ lb., \$1.25.**

#### Dwarf Shirley Poppy, Snow White

**1331.** The flowers are of the greatest beauty and if a portion of them, as sometimes happens, have a slight rose tinge towards the tip of the petals, it only adds to their attractiveness. This novelty is of great merit and it will become a favorite, having regard to the very simple culture needed and the wealth of bloom which the annual Poppies yield so continuously during the summer months. **Pkt., 10c.; ½ oz., 20c.**

## VAUGHAN'S

### DOUBLE POPPIES

#### "CORNELL"—Vaughan's "Nameless" New Poppy.

**1354.** This is one of the richest and most effective of all Poppies. The plants grow 2½ feet high, the foliage is very large and of beautiful bluish-green and the flowers are very double and 6 to 7 inches over in diameter. The color is the brightest fiery scarlet imaginable, with a clear white line in the center of the petal, running half way up its length. 1 pkt. of this beautiful new Poppy is sent free with every order of flower seeds amounting to 25c. and upwards.

**1340. "White Swan."** One of the most effective and valuable Poppies. The plants are about 18 in. high, grow in very pretty bush form, crowned with flowers of enormous size, perfect form, very double and the purest snow white. **Price, 10c., 3 for 20c.**

## VAUGHAN'S

### SINGLE POPPIES

#### Iceland Poppies, in Separate Colors

**1326.** Yellow. **1327.** White. **1328.** Orange scarlet. Each, **pkt., 10c.; any 3 for 25c.**

**1329.** Double Iceland Poppies. Mixed **Pkt., 15c.; 2 pkts. for 25c.**

**1330. The Tulip Poppy.** The perfect and striking flowers are intensely vivid in color; the two outer petals form a tulip cup; after a while deep black spots appear at the base of each petal. The glowing scarlet of the large flowers is such that the eye cannot bear its glare when the sun is shining on it. **Pkt., 10c.; ½ oz., 20c.**

**1357. Peacock Poppy.** Scarlet, with jet black zone. **Pkt., 5c.; ½ oz., 10c.**

#### Miss Sherwood

**1332.** Sturdy plants 2½ feet high, with noble foliage, bear in profusion large single flowers of a shining, satiny white, the upper half of the corolla being a silky chamomile rose. This is a combination of color quite virginal in its delicacy. **Large Pkt., 10c.; ½ oz., 20c.**

Shirley Poppy. No. 6195.

- 6145 JAPANESE POMPON, FINEST MIXED. Double fringed flowers varying in color from white to crimson; extremely beautiful; 15 inches, Oz., 1.25;  $\frac{1}{4}$  oz., .40 .15

- 6140 HOOKER'S SINGLE MIXED. A superb strain producing the brightest and largest flowers; 2 ft. . . . . Oz., .40 .05

RUDBECKIA,  
THE TWO-COLORED  
CONE FLOWER,—from a  
Fordhook Photograph

2534 **Rudbeckia**  
**Speciosa Bicolor.**

*This is an extremely showy and very free-flowering annual of the easiest culture. It blooms profusely throughout the summer and fall from seed sown in the open ground in the spring. The plants grow eighteen inches in height, branching freely, with dark-green foliage. The flowers are produced singly on stiff stems about six inches in length above the foliage, and average two to three inches in diameter. The flowers have a large rounded purplish cone in the center, with narrow petals spreading in ray-like form around the base of the cone. These petals are a deep orange-yellow, heavily marked with brownish-red on the inner portion, making a broad band around the cone. Many of the flowers come semi-double. A most attractive novelty that should become extremely popular. Pkt. 10 cts.*

# SALVIA

(Flowering Sage)

J. M. THORBURN & CO.

- SPLENDENS.** These are the well-known bedders, single plants of which carry hundreds of long, flaming flower-spikes open at one time, keeping up the display until frost.

| 3606  | "         | Black-seeded Dark Scarlet. | New. Very dark scarlet; compact growth . . . . .  |                     | 10 |
| 3607  | "         | Lord Fauntleroy.           | Our new dwarf Salvia, introduced last year. The plants grow only 18 inches high, are very compact and covered with flower-spikes standing clear above the foliage and of a brilliancy of color exhibited by no other plant. Fine for bedding in masses or for borders around beds of taller plants. |                     | 25 |
| 3607a | "         | Maroon Prince.             | Maroon color; striking and distinct. New variety . . . . .  |                     | 25 |

## New Salvia splendens, Golden Blotched Foliage

A most attractive new strain with light green leaves blotched light golden. The plant is of very compact habit, about 20 inches high by the same diameter, with the bright scarlet flower-spikes standing clear above the foliage; extremely floriferous. Pkt. 25 cts.

## HENRY A. DREER 'PHILADELPHIA' PA.

### Salvia Splendens "Ball of Fire."

- 3934 A new dwarf early-flowering sort, which may be briefly described as a compact form of the popular sort "Bonfire." The plant itself rarely grows over a foot high, while the erect spikes of brilliant scarlet flowers average a foot in length, making the total height of the plant when in full bloom between 20 and 24 inches by about the same in diameter. A valuable characteristic of this new sort is that it is the earliest to flower, remaining in bloom as late as any. Stock limited. 20 cts. per pkt.; 3 pkts., 50 cts.

### Salvia Splendens "Maroon Prince."

- 3936 A form of the well-known Scarlet Sage, and identical to it in every way except in color, which is of a deep claret-maroon. 15 cts. per pkt.; 2 pkts., 25 cts.

Salvia Splendens "Fireball"

1424. Of the many sorts of Salvia which are now cultivated this splendid novelty undoubtedly is the finest of all. It has larger flowers and is also more free flowering than any other kind. It forms a bush of about 15 to 20 inches in height, from which spring the broad, long spikes, covered with a great number of flowers of the most fiery scarlet. The plants branch very freely and are most profuse bloomers, from the side shoots even from 4 to 6 flowering spikes are often produced, all evenly divided over the foliage and more or less of erect habit, thus hiding the foliage. It is the earliest of all, flowering by the beginning of July and continues without a break until frost. It is easily raised from seed and comes true. Pkt., 15c.; 2 for 25c.

VAUGHAN'S

New Salvia Splendens, Drooping Spikes.

1415—This new, large flowering Salvia (Scarlet Sage), has three times the flowering capacity on each spike of the ordinary Salvia Splendens. The flowers are produced in great numbers causing the spikes to droop by their weight. It is one of the most desirable plants for decorative purposes if planted either singly, in groups or with other plants. The flowers are of the most brilliant, dazzling scarlet, produced in endless profusion and until late in the fall. Pkt. (75 seeds), 10c.; 3 for 25c.; ½ oz., 40c.

### SALVIA SPLENDENS "SILVERSPOT."

1416—The leaves are rich soft dark green with light sulphur or cream colored spots of various size liberally sprinkled over them. A charming variety of great effect. Pkt., 10c.

### GOLDEN-LEAVED SALVIA.

1418—One of the most brilliant and attractive plants. Habit, compact, short-jointed and branching with an abundance of foliage which is of a fine yellow shade, hardly a trace of green about it. The scarlet flowers are of exceptional brilliancy, far more brilliant than the common Salvia Splendens. The color of the foliage is constant, and its color is perhaps intensified by heat. Pkt. (100 seeds), 10c.; 3 for 25c.

1418a—NEW SALVIAS MIXED. Above three kinds. pkt. (150 seeds), 15c.

**VAUGHAN'S**

**SCABIOSA, SNOWBALL.**

(MOURNING BRIDE.)

The Scabiosa is an elegant cut flower, exceedingly fine colors and good keepers. Some kinds are almost black.

**1435—SNOWBALL.** The flowers of this novelty are large, measuring nearly 2 inches in diameter, of purest white and very double. The stems are very long and the foliage luxuriant. This plant comes quite true from seed and is sure to be liked for vases and bouquets. Pkt., 10c.; 3 for 20c.

**1436—Golden Yellow.** The color has long been desired in the Scabiosa family and is now obtained after years of selections. The flowers are double, of a fine pure yellow color and are charming for bouquets. The plants are semi-dwarf and very free-blooming. Pkt. 5c.

**1437—Black Prince.** The flowers are very large and double and nearly black, a beautiful color, very effective as a bunch in a vase. Pkt., 5c.

**1438—Double Blood-Red.** A very striking color. Pkt., 5c.

# SUNFLOWER

(*Helianthus*)

J. M. THORBURN & CO.

Very stately decorative plants with great masses of yellow flowers. A few plants of the tall sorts can be placed here and there throughout the grounds with telling effect ; it is the gardener's art to know how to locate them. Their golden yellow disks are like sunbursts among the shrubbery, and for backgrounds and screens nothing could be finer. Their long stems and wonderful lasting qualities also make them valuable as cut-flowers. Like the Eucalyptus, they are said to be good for absorbing the miasma of low grounds. Plant the seed in the open garden in spring, and thin the plants to stand 3 to 4 feet apart. The height of the different varieties varies greatly; all those below are hardy annuals.

SUNFLOWER

## R. & J. FARQUHAR & CO.

No. 4153. **HELIANTHUS CUCUMERIFOLIUS NANUS ALBUS**. A white variety of the popular *Helianthus cucumerifolius* is an interesting novelty. The plant grows about 2 feet in height and is very floriferous. The flowers come on long stems and are useful for cut-flower purposes. Pkt., .15; 4 pkts., .50.

# HENRY A. DREER · PHILADELPHIA · PA. SUNFLOWER

## Single-flowering Sorts.

The single Sunflowers are indispensable for cutting. Sown on a sunny spot in April or May they come into bloom early in summer, and keep up a constant supply of flowers until cut down by frost.

- 2701 **Cucumerifolius** (*Miniature Sunflower*).  
Small-flowered dwarf; single; rich yellow. An abundant bloomer. (See cut.) Per oz., 25 cts. .... 5

- 2703 — **Stella** (*Improved Miniature Sunflower*). Differs from the above by its larger and better formed flowers of the purest golden-yellow, with black disc. Per oz., 30 cts. .... 5

- 2702 — **Orion**. Effective new variety of "Stella." The petals are twisted like a Cactus Dahlia ..... 10

- 2700 — **New Miniature**. A multitude of new varieties have been raised from the popular Miniature Sunflower which we offer in mixture. They all differ from the parent, most of them being larger, and many with curiously-twisted petals. The prevailing colors are pale-yellow, golden-yellow, and creamy-white, some with black centres and all beautiful; for cutting they are indispensable ..... 10

- 2707 — **Perkeo**. A charming dwarf variety of the Miniature Sunflower. The plants form compact bushes about 12 in. high by 14 in. through. There are many positions, such as the front of borders or beds of plants of medium height, where this can be used to good advantage, flowering as it does from the end of June until cut down by hard frost. .... 15

MINIATURE SUNFLOWER.

## RED PERENNIAL SUNFLOWER.

(*Echinacea* × *Helianthus*.)

- 2708 This novel and interesting hardy perennial was raised in Germany and is described by the originator as being a cross between *Echinacea* (*Rudbeckia*) *hybrida* and *Helianthus multiflorus*, the latter being the pollen parent.

The plant attains a height of from 5 to 6 feet, and in general habit resembles sometimes one parent and sometimes the other. The flowers vary from 4 to 10 inches in diameter and in shape closely follows the Sunflower, having a flat disc and horizontal ray florets. In color, however, it resembles its other parent, being a purplish red, made brighter by the infusion of the yellow blood of the Sunflower. The flowers are excellent for cutting for decorative purposes, lasting a long time cut, and with stems from 18 to 36 inches long. The time of flowering extends from July to October—a long season. If sown early, will bloom the first year from seed, but they do not attain perfection until the second season. From 60 to 70 per cent. come true from seed. 25 cts. per pkt.; 5 pkts. for \$1.00.

DOUBLE GLOBE SUNFLOWER.

## Double-flowering Sunflowers. PER PKT.

- 2706 **Nanus Fl. Pl.** (*Globe of Gold*). Dwarf, double-orange flowers; 4 feet. Per oz., 25 cts. .... 5

- 2704 **Globosus Fistulosus** (*Globe or Dahlia Sunflower*). Flowers large, double, of a rich saffron color; 6 feet. (See cut.) Per oz., 25 cts. .... 5

- 2697 **Double Yellow Miniature**. While many prefer single flowers on account of their generally more artistic form, others like the double forms as being more lasting when used as cut flowers; both have their uses, and this new variety will in a measure please both, the flowers, while double, being quite free and graceful; grows about 4 feet high; flowers 3 inches across, of a bright golden-yellow ..... 10

- 2698 **Double White Miniature**. A new double, nearly white sort. A certain proportion of the seedlings produce semi-double flowers, which are as desirable as the completely double form. In habit of growth and profusion of flower it is identical to the well-known single variety. .... 15

## NEW SWEET PEAS

Price of any of the following, except where marked, Pkt., 5c.; oz., 10c.

**1499. Agnes Johnson.** A fine, erect, pale salmon pink standard, buff wings, generally three flowers on a stem. One of the best of its class.  $\frac{1}{4}$  lb., 20c.; lb., 65c.

**1498. American Queen.** Flowers larger; usually three on a long stem and a very profuse bloomer. Color, a clear salmon-red, the wings, bright deep rose.  $\frac{1}{4}$  lb., 20c.; lb., 65c.

**1509. \*Bridesmaid.** This is a selection from Katherine Tracy, and is exactly like it, except in color, which is a bright and deep pink. Pkt., 10c.; oz., 15c.;  $\frac{1}{4}$  lb., 40c.; lb., \$1.30.

**1521. Dainty.** Very large and of good substance. Color, pure white with the edge of the petals daintily tinted with pink, making a most charming contrast.  $\frac{1}{4}$  lb., 30c.; lb., \$1.00.

**1517. Dorothy Eckford.** "The grandest pure white. In addition to its pureness it is a grand giant flower, also robust in growth and stem, with no tendency whatever to tinge or go pink; the plant is very short jointed, and grows an enormous mass of bloom."  $\frac{1}{4}$  lb., 30c.; lb., \$1.10.

**1530. \*Evening Star.** A pale buff, flushed with salmon-pink. It is really an open-form Venus; it stands the sun without burning.  $\frac{1}{4}$  lb., 30c.; lb., \$1.10.

**1533. \*Flora Norton.** It is a very bright blue, quite different from Countess of Radnor and kindred varieties, being a brighter blue and clearer color. Pkt., 10c.;  $\frac{1}{4}$  oz., 15c.; oz., 30c.;  $\frac{1}{4}$  lb., 80c.; lb., \$3.00.

**1542. Florence Fraser.** An Improved Blanche Ferry. Height, 6 to 7 feet; color, pink and white; flower stems 12 to 14 inches long and very stout, bearing three and four large blooms. A strong, vigorous grower and free early bloomer. It surpasses Blanche Ferry in vigor, flower and stem, freedom and earliness. Pkt., 10c.; oz., 20c.; 2 ozs., 35c.;  $\frac{1}{4}$  lb., 60c.; lb., \$2.25.

**1534. George Gordon.** A carmine crimson standard, wings lavender. Flower very large.  $\frac{1}{4}$  lb., 25c.; lb., 75c.

**1497. Gladys Unwin.** Has a very large and bold flower, not hooded, but with a very striking upright crinkled or wavy standard and broad wings. Color, a pale rosy pink. A striking feature is that about 75 per cent of the long flower stems are with four blooms, which is a most unusual thing in Sweet Peas. Pkt. (25 seeds) 25c.

**1536. Golden Rose.** The flowers are extra large, of fine open form. Color, clear primrose yellow, flushed with rosy pink.  $\frac{1}{4}$  lb., 25c.; lb., 80c.

**1538. Gracie Greenwood.** Soft salmon-pink; distinct edging of deeper pink.  $\frac{1}{4}$  lb., 25c.; lb., 75c.

**1543. Janet Scott.** A rich deep pure pink, flowers very large size.  $\frac{1}{4}$  lb., 25c.; lb., 80c.

**1544. Jeanie Gordon.** The standards are bright rose, shaded cream, slightly hooded wings. Flowers large; a charming variety.  $\frac{1}{4}$  lb., 20c.; lb., 65c.

**1589. King Edward VII.** A true giant-flowered variety, with strong stems and growth, with no inclination to burn in the sun. A fine variety, much brighter than either *Mars* or *Salopian*; in fact, the best dark red in existence.  $\frac{1}{4}$  lb., 30c.; lb., \$1.10.

**1550. Lady M. Ormsby Gore.** A very vigorous sort; flowers large and hooded. Color primrose, delicately shaded with buff.  $\frac{1}{4}$  lb., 25c.; lb., 75c.

**1551. Lord Roseberry.** Flowers very large, hooded; color, rosy carmine, with deeper veins. Very free flowering; vigorous.  $\frac{1}{4}$  lb., 20c.; lb., 65c.

**1557. Majestic.** One of the loveliest of Sweet Peas. Rich, deep, rosy pink.  $\frac{1}{4}$  lb., 25c.; lb., 70c.

**1558. Miss Wilmott.** Standards rich, deep orange pink; wings a shade lighter. Of enormous size.  $\frac{1}{4}$  lb., 20c.; lb., 70c.

**1560. Mont Blanc.** Of dwarf growth and very early blooming habit. Flowers pure white, of good size and substance.  $\frac{1}{4}$  lb., 20c.; lb., 70c.

**1583. Sue Earl.** The standard is primrose with mauve at the edges, wings almost pure primrose.  $\frac{1}{4}$  lb., 25c.; lb., 75c.

**1563. \*Mrs. Geo. Higginson, Jr.** A clear, delicate light blue, showing practically no tint of mauve. It is a thing our growers have been working for for years, and while it is not any larger than the old Countess of Radnor, it is a particularly fine shade. It is especially valuable for florists and is a decided novelty. Pkt., 10c.;  $\frac{1}{4}$  oz., 20c.; oz., 35c.;  $\frac{1}{4}$  lb., 95c.; lb., \$3.50.

## Countess Spencer Hybrids

The New Orchid-Flowering Sweet Pea

**1513.** The type and form of these is a complete departure from anything yet introduced. Both the wings and standard are very large, and its graceful form, together with the immense size, makes it by far the most attractive variety in existence. There are five or six distinct shades contained in this mixture, but all are of the large flowering type and of the same form. The different shades it contains are as follows: Deep pink, light pink, ovid shade, orange pink, white with light pink edging. We certainly think highly of the various shades which this mixture contains. Pkt., 15c.,  $\frac{1}{2}$  oz., 30c.; oz., 60c.; 2 ozs. \$1.00.

**1567. Nymphaea.** A large flower with long stem usually four blossoms to the stem. First blossom opens almost white, and then turns to a bright deep pink. Of the four blossoms, the top one is nearly white and the bottom one deep pink. Very attractive and pretty and one of our best.  $\frac{1}{4}$  lb., 50c.; lb., \$1.00.

**1581. Speckled Beauty.** A good large flower of perfect shape. Primrose, with heavy dusting and shading of pink; comes truer and larger than Pink Friar, and is really a good thing.  $\frac{1}{4}$  lb., 50c.; lb., \$1.00.

**1584. Sunrise.** Particularly distinct on account of its color, which is a bright pink suffused with primrose; flowers good size and open form. There is no other color in Sweet Peas like it.  $\frac{1}{4}$  lb., 30c.; lb., \$1.00.

**1591. White Wonder.** The flowers are pure white, of the largest size, and are borne six to eight and frequently as many as ten to twelve large flowers on a long stout stem. The stems are frequently double. The flowers are well placed near top of stem and generally all facing one way. The vines bloom profusely, about half the flowers having double standards  $\frac{1}{4}$  lb., 25c.; lb., 75c.

## VAUGHAN'S

### New Cupid Sweet Peas

Any of the following: Pkt., 5c.; oz., 10c.,  
½ lb., 30c.; lb., \$1.00. One pkt. each of the  
six New Cupids, 20c.; one oz. each, for 35c.

**1634. America Cupid.** The standard and wings are very broad and spreading showing effectively the bright blood-red stripings on silvery-white ground.

**1635. Enchantress Cupid.** Most beautiful, both for bedding and *boutonnieres*. Generally three flowers on each stout stem; rose-pink on rich cream ground. The rose-pink is deepest in color at base of standard.

**1646. Firefly Cupid.** The large flowers are dazzling scarlet.

**1632. Mauve Queen Cupid.** Deep pinkish mauve upon primrose ground, with wings only a shade lighter than the standard.

**1650. Sadie Burpee Cupid (w. s.).** The standard measures *nearly two inches across* while the wings spread out. The expanded flowers are uniformly of pure *pearly whiteness*.

**1637. Stella Morse Cupid.** The ground color is a rich creamy buff, tinted with apricot, while the inner portion of the wings is delicately shaded with soft rosy carmine.

The New Sweet Pea, "Gladys Unwin"

The finest pink Sweet Pea yet introduced. It has a very large and bold flower, not hooded, but with a very striking upright crinkled or wavy standard and broad wings. Color, a pale rosy pink. A striking feature is that about 75 per cent of the long flower-stems are with **four blooms**, which is a most unusual thing in Sweet Peas. It was first raised four years ago, and has kept perfectly true and fixed in character each year since. It was shown last season at the flower shows in England, and all the horticultural papers speak very highly of it. Pkt. (25 seeds) 25 cts.

Sweet Pea. Gladys Unwin. No. 7576.

## SWEET PEA.

No. 7576. GLADYS UNWIN. A very large and bold flower, not hooded; but with a very striking upright crinkled or wavy standard and broad wings. Color a pale rosy pink. A striking feature is that about 75 per cent. of the long flower stems are with four blooms, which is a most unusual thing in Sweet Peas. It was raised in England four years ago, and has kept perfectly true and fixed in character each year since. For Market Growers especially it cannot be surpassed, and is just the lovely pink color which is so in demand. Original pkt., .25; 6 pkts., \$1.25.

No. 7521. SWEET PEA, DOROTHY ECKFORD. A new strong, pure white variety bearing large, well-expanded flowers on long, stout stems, three flowers on a stem. Experts consider this the best white sort. Lb., \$1.00; ¼ lb., .30; oz. pkt., .10.

No. 7650. SWEET PEA, KING EDWARD VII. This is an intense bright crimson self-colored sort, brighter than Mars or Salopian. It is of strong growth, the flowers borne on long, stout stems, and they have no tendency to burn in the sun. Oz., .20; pkt., .10.

# SWEET PEAS

Our stocks are **absolutely unsurpassed in selection, purity and vitality.**

Our prices are reasonable, being lower than those of many smaller firms, but were we to charge twice as much the quality of the stocks **could not be improved.**

**CULTURE**—Early in spring make a trench about six inches deep in rich, mellow soil, so arranged that no water can stand in it and plant the seed in the bottom, covering no more than two inches. Sweet Peas, particularly the white seeded sorts, are often a little difficult to start. If the soil is too dry they will remain a long time without germinating; if it is too wet and cold they will not sprout at all. In soils at all heavy or composed largely of clay put about two inches of sand in the bottom of the trench and sow the seed on this, covering with more sand. Cover the row with a board to shed the rain and protect the soil from the hot sun, but remove this as soon as the young plants appear. When the plants are about five inches high, gradually fill up the trench and furnish some support for the vines to run upon. The blooms should be picked before they form pods or the plants will soon stop flowering.

## FORCING AND INDOOR SORTS

**Extra Early Blanche Ferry, Mont Blanc, Josephine White and Inconstancy** with us have proven most desirable varieties for forcing. These and other sorts marked thus (\*) have given the best results in their respective classes of colors when grown indoors.

## WHITE

**MONT BLANC.\*** This variety originated in the Extra Early Blanche Ferry and like that sort is of dwarf, slender, very graceful habit with narrow leaves, throwing the blossoms well out from the foliage so that every one is well exposed. Its greatest merit is in its extreme earliness and its consequent fitness for forcing. Flowers of good form and size and very clear white color. **Pkt. 5c; Oz. 10c; ¼ Lb. 25c; Lb. 75c.**

**JOSEPHINE WHITE.\*** One of the earliest white Sweet Peas and especially desirable for forcing. Habit like Emily Henderson but earlier and produces flowers during a longer season. Very desirable for cutting. **Pkt. 5c; Oz. 10c; 2 Oz. 20c; ¼ Lb. 30c; Lb. \$1.00**

**EMILY HENDERSON.** A bold, well formed, clear white flower. Wings broad and well expanded. An early and wonderfully free and persistent bloomer. The flowers have more substance and the plant more vigor than the other whites and it will give good flowers where most sorts fail. **Pkt. 5c; Oz. 10c; ¼ Lb. 20c; Lb. 50c.**

**BLANCHE BURPEE.** A splendid pure white variety. While not so profuse a bloomer or as hardy a plant as the Emily Henderson, the flowers are fine. **Pkt. 5c; Oz. 10c; ¼ Lb. 20c; Lb. 50c.**

**THE BRIDE.** Flowers like the Blanche Burpee but stems more slender, more gracefully poised, and attractive for bunching. **Pkt. 5c; Oz. 10c; ¼ Lb. 20c; Lb. 60c.**

## LIGHT YELLOW

**INCONSTANCY.\*** Aside from being extremely early is remarkable because the same plant will at one period of growth give pure white flowers and at another period flowers unquestionably primrose. Frequently white and primrose flowers are found on one plant at the same time. **Pkt. 5c; Oz. 10c; 2 Oz. 20c; ¼ Lb. 30c; Lb. \$1.00**

**MRS. ECKFORD.** Plant strong-growing and vigorous; stems three and four flowered; flowers large, of great substance and perfect form. A delicate shade of primrose yellow at first, becoming nearly white at maturity. **Pkt. 5c; Oz. 10c; ¼ Lb. 20c; Lb. 55c.**

**QUEEN VICTORIA.** Light primrose of hooded form showing a pink tint while in the bud but a clear soft primrose when matured. **Pkt. 5c; Oz. 10c; ¼ Lb. 20c; Lb. 60c.**

**THE HON. MRS. E. KENYON.\*** The best of the deeper primrose shades; a beautiful large semi-hooded flower. **Pkt. 5c; Oz. 10c; ¼ Lb. 25c; Lb. 75c.**

## LIGHT PINK

**MRS. SANKEY.** Standard round, very thick; delicate shell-pink, wings a little lighter than standard. Beautiful delicate pink, becoming white as it fades. **Pkt. 5c; Oz. 10c; ¼ Lb. 20c; Lb. 50c.**

**LOTTIE HUTCHINS.** Standard and wings of light primrose with stripes of light pink. One of the best of the hooded shapes. **Pkt. 5c; Oz. 10c; ¼ Lb. 20c; Lb. 60c.**

**STELLA MORSE.** The flowers of this variety are of the finest form and a peculiar warm salmon-pink. A combination yellow and pink, which is quite distinct and very attractive. **Pkt. 5c; Oz. 10c; ¼ Lb. 20c; Lb. 60c.**

**VENUS.** Standard large, of fine form and substance; a brilliant but delicate and soft shade of warm rose-pink and buff; wings similar to the standard. **Pkt. 5c; Oz. 10c; ¼ Lb. 20c; Lb. 50c.**

**COQUETTE.** Large, finely formed flower. Standard warm primrose shaded purple; wings primrose. **Pkt. 5c; Oz. 10c; ¼ Oz. 20c; Lb. 60c.**

**LOVELY.\*** Flowers very large, fine form. A delicate shell pink tinged with yellow, often four flowers on a stem. **Pkt. 5c; Oz. 10c; ¼ Lb. 20c; Lb. 60c.**

**ELIZA ECKFORD.** Large flower of rosy pink over white, exceedingly delicate and beautiful. **Pkt. 5c; Oz. 10c; ¼ Lb. 20c; Lb. 50c.**

**PRIMA DONNA.\*** The stems bear three or four very large, perfect flowers of a brilliant yet soft shade of pink. **Pkt. 5c; Oz. 10c; ¼ Lb. 20c; Lb. 60c.**

**ROYAL ROBE.** Bright rose pink. Those who like a hooded, gracefully rolled standard will be pleased with this sort. **Pkt. 5c; Oz. 10c; ¼ Lb. 20c; Lb. 55c.**

**KATHERINE TRACY.\*** The color is a soft but brilliant pink, in wings and standard. Plants vigorous and give a profusion of flowers which continue large and fine until the end of the season. In hardness, prolific flowering habit, durability and practical usefulness this is greatly superior to most sorts of recent introduction. **Pkt. 5c; Oz. 10c; ¼ Lb. 20c; Lb. 60c.**

**SHAHZADA****SWEET PEAS—Continued****ORANGE PINK**

**LADY MARY CURRIE.\*** A large, well formed flower of brilliant orange-pink color. Similar to Lady Penzance, but rounder and of more brilliant color. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 60c.

**ORIENTAL.** The large, finely formed flowers are a primrose or even yellow shade, very striking and attractive. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 60c.

**MISS WILLMOTT.\*** A fine semi-hooded type; standard orange pink; wings rose tinted with orange. Of very large size, long stems, plant very vigorous. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 25c; Lb. 75c.

**RED STANDARD WITH WHITE WINGS**

**EXTRA EARLY BLANCHE FERRY.** This is the pioneer extra early sweet pea and bears much the same relation to the other sorts of this section that the original Blanche Ferry does to other American sorts, in that it is of vigorous and hardy though dwarf habit, and a wonderfully free and persistent bloomer. It will be found to be one of the first varieties to furnish flowers, either in greenhouse or out of doors, and it will continue to furnish them in great abundance longer than most varieties. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 60c.

**BLANCHE FERRY.** Standard medium sized, but of fine form and bright pink color; wings large, rounded and nearly white. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 50c.

**SHADES OF RED**

**MRS. DUGDALE.\*** A large, finely formed flower of a peculiar shade of primrose overlaid with crimson-rose. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 60c.

**IVID.** A good sized, hooded flower of bright pink overlaid with a darker shade. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 50c.

**LORD KENYON.** Magenta rose; wings veined with a deeper shade. Similar to American Queen, but hooded instead of open form. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 60c.

**HER MAJESTY.** The flowers are very large, and both the standard and wings are beautifully curved and a delicate rose-pink color. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 60c.

**PRINCE OF WALES.** Flowers very large and a peculiar, brilliant red, distinct in shade from any other sweet pea. Very attractive. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 60c.

**LAVENDER AND LIGHT BLUE**

**MAID OF HONOR.** Medium sized flower, nearly white, having a distinct edging of blue which gives it a peculiar and very attractive appearance. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 60c.

**BUTTERFLY.** Standard a combination of shades of violet and lavender; it is often notched on the sides. Wings white, shaded and edged with blue. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 50c.

**LOTTIE ECKFORD.** Standard a peculiar and delicate shade of magenta blue; wings very large, long and shaded lavender deepening to violet at edge. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 50c.

**FASCINATION.** Standard lilac, wings blue tinged with lilac; the blossom finally turning to a bright blue. Large size, hooded form. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 60c.

**DOROTHY TENNANT.\*** Flowers warm violet or mauve, finely formed. Standard broad, incurved or hooded; wings very large, rounded. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 50c.

**COCCINEA.** Distinct in color, a bright cherry red and unlike any other we offer. Very pleasing and effective. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 25c; Lb. 75c.

**ROYAL ROSE.** One of the largest and finest formed flowers yet produced. Standard a deep rose-pink; wings a lighter shade of the same color. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 60c.

**BRILLIANT.** Flower of good size and substance. Standard round and inclined to curve forward. Color very brilliant rich red. Mars is similar, but fades purple. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 60c.

**FIREFLY.** Very bright and intense crimson-scarlet, of good size and form. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 60c.

**SALOPIAN.\*** One of the most brilliant and most richly colored sorts yet introduced. The flowers are of faultless form, large and a very rich, brilliant cardinal red. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 60c.

**COUNTRESS OF RADNOR.** Self colored in a very distinct and beautiful shade of lavender. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 60c.

**LADY GRISEL HAMILTON.\*** A large flower similar in color to Countess of Radnor, but nearer blue. A strong grower, producing an abundance of very fine flowers. Superior to Celestial. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 60c.

**BLUE AND PURPLE**

**COUNTRESS OF CADOGAN.\*** Stems very long, each bearing three or four flowers, a little darker than Navy Blue. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 60c.

**WAVERLEY.** Wings and standard are a beautiful blending of rose-pink and lavender-blue shades which vary as the flower matures. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 50c.

**CAPTAIN OF THE BLUES.** Standard large, broad, bright purple-blue; wings expanded, lighter and brighter blue than standard. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 55c.

**NAVY BLUE.** A true blue, quite distinct. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 60c.

**INDIGO KING.** Standard very rich purple-maroon; wings more blue. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 50c.

**EXTRA EARLY  
BLANCHE  
FERRY****STELLA  
MORSE**

# Sweet Peas—Continued

## PINK AND RED STRIPES

**AURORA.** Very large and of fine form. The standard and wings are striped and flaked with delicate orange-salmon-pink over white. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 55c.

**GOLDEN ROSE.** Primrose striped and mottled with light pink. Of semi-hooded form and largest size. One of the most attractive of the newer sorts. Pkt. 5c; Oz. 15c; 2 Oz. 25c;  $\frac{1}{4}$  Lb. 40c; Lb. \$1.25

**MRS. JOSEPH CHAMBERLAIN.** Very large and perfect shaped flowers; white, striped with bright rose-carmine. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 50c.

**AMERICA.\*** White, nearly covered with splashes, stripes and dots of exceedingly bright carmine. The most brilliant red striped sort. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 50c.

## PURPLE STRIPES

**GRAY FRIAR.\*** Very large, finely shaped flowers of delicate heliotrope color, tinged, marbled and dotted with darker shade. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 50c.

**PRINCESS OF WALES.** Standard broad, flat, striped purple on nearly white ground; wings very large and lighter colored than standard. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 50c.

**SENATOR.** Standard broad, very large, delicate lavender, nearly covered with stripes and splashes of purple-maroon; wings medium sized, round, striped with a bluer shade than the standard. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 50c.

## CLARET AND MAROON

**MONARCH.** Standard large, fine form, violet-maroon; wings very large and expanded; quite similar in color to the standard, but having a blue shade. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 50c.

**DUKE OF CLARENCE.** A fine flower with large standard and wings of uniform shade of dark claret. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 50c.

**BOREATTON.** One of the darkest and richest colored. Standard large, rounded; rich, satin-like maroon; wings are similar in color to the standard. One of the best dark varieties yet produced. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 50c.

**STANLEY.\*** A very beautiful sort. Standard large and flat, color a deep maroon and warmer than Boreatton. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 50c.

**BLACK KNIGHT.** One of the darkest varieties. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 55c.

**SHAHZADA.\*** This has a very rich, dark maroon standard and deep violet wings. One of the finest dark sorts. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 60c.

**OTHELLO.** A very dark maroon, practically self colored, with almost black veining. Large size, hooded form. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 20c; Lb. 60c.

# Cupid, or Dwarf Sweet Peas

When the Cupid Sweet Pea was introduced, it seemed to most people that its distinct habits had so delighted its propagators that they had exaggerated its value, but continued trial demonstrates that in those localities where the conditions of soil and climate are favorable for its best development, it is even more valuable than was claimed. For growing in pots, for edgings and bedding, the Dwarf Sweet Peas are a valuable addition to our flowering plants. They require no support, but form a low, compact bush covered with large, finely formed flowers.

**CULTURE**—Cupid Sweet Peas require a well drained, rich soil and care should be taken that the seed is not covered to exceed one inch in depth and that the surface soil does not become caked or hard. Sow in a sunny situation somewhat later than other Sweet Peas and give each plant plenty of room. The white seeded varieties are especially liable to rot if exposed to extreme moisture. They germinate best in moist, sandy soil. If such is not available, a little damp sand should be placed in the bottom of a trench and the seed embedded in it and then covered to a depth not exceeding one inch. Place a board over the row, supported two or three inches above the soil, so as to afford protection from rain and sun. Be careful to remove the board as soon as the young plants begin to appear.

**ALICE ECKFORD CUPID.** Flowers creamy white, blended with shades of pink and borne on stiff stems well above the foliage. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 25c; Lb. 75c.

**APPLE BLOSSOM CUPID.** Standard rose on white, with lighter wings. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 25c; Lb. 75c.

**BEAUTY CUPID.** An exceedingly large and perfectly formed flower of a beautiful rose color shaded with dark carmine. A very free bloomer. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 25c; Lb. 75c.

**BOREATTON CUPID.** Standard large, rounded; dark, rich, satin-like maroon; wings are similar in color to the standard. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 25c; Lb. 75c.

**CAPTAIN OF THE BLUES CUPID.** Large, bright purple-blue standard, wings a lighter and brighter shade. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 25c; Lb. 75c.

**COUNTESS OF RADNOR CUPID.** A large, beautiful lavender self. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 25c; Lb. 75c.

**EXTRA EARLY BLANCHE FERRY CUPID.** The earliest of the dwarf forms. Very attractive and blooms freely. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 25c; Lb. 75c.

**FIREFLY CUPID.** Very bright and intense crimson-scarlet; of good size and form. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 25c; Lb. 75c.

**HER MAJESTY CUPID.** Large and beautiful rose-pink flowers. Both the standard and wings are beautifully curved. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 25c; Lb. 75c.

**MRS. JOS. CHAMBERLAIN CUPID.** Rose, striped on white; of large size and best hooded form. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 25c; Lb. 75c.

**PRIMROSE CUPID.** Flowers yellowish-white in front, pronounced primrose-yellow on the back; hold form and color well. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 25c; Lb. 75c.

**PINK CUPID, OR DWARF BLANCHE FERRY.** Inheriting the good qualities from the popular Blanche Ferry, the plants are unusually vigorous and floriferous. Blooms are bright, attractive and borne on long stems. Seed being dark is of strong vitality, succeeding where some weaker sorts fail. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 25c; Lb. 75c.

**ROYALTY CUPID.** Large standard and wings of a beautiful rose-pink color. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 25c; Lb. 75c.

**WHITE CUPID.** Flowers large, clear white, and of fine form. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 25c; Lb. 75c.

**CUPID MIXED.** This mixture is composed of choice shades of white, yellow and red, from light rose to deep scarlet and maroon. Pkt. 5c; Oz. 10c;  $\frac{1}{4}$  Lb. 25c; Lb. 75c.

# Burpee's

DOROTHY ECKFORD.

KING EDWARD VII.

COUNTESS SPENCER.

SCARLET GEM.

## Most Beautiful New Tall Sweet Peas.

**3040 Scarlet Gem.** "This is undoubtedly the greatest advance in color ever made and has already become famous. The color is *almost dazzling scarlet*, beautiful, bright, and clear, a color much to be desired both for home table decoration and for exhibition; for the latter purpose it is absolutely indispensable. It also shows well in artificial light, which is an immense advantage. It is strong in growth, with sturdy stems and wonderfully free flowering, so that it should be planted at least six to nine inches apart."—*Henry Eckford.*—While the flowers are not of the largest size and generally come only two on a stem, SCARLET GEM certainly is a "*startling*" novelty. It has already created a great sensation in England, where it has been pronounced as "a wonderful color, closely resembling that of a *Scarlet Geranium*."

Per pkt. (of twenty seeds) 10 cts.;  $\frac{1}{4}$  oz. 40 cts.;  $\frac{1}{2}$  oz. 75 cts.

**2963 Dorothy Eckford.** "The grandest pure white yet produced,"—so says Henry Eckford, the originator. And yet we are not willing to admit until another year's trial that in all points it is superior to Eckford's famous *Blanche Burpee*. However, it is of *heavier substance*, which gives it a great advantage. The grand pure white flowers are beautifully shell-shaped, of extra large size, and borne three on a stem; while of beautiful hooded form, yet (unlike most other hooded varieties) it never curls badly. It is very robust in growth, and the vines produce an enormous mass of bloom.

Per pkt. 10 cts.; oz. 15 cts.;  $\frac{1}{4}$  lb. 40 cts.; per lb. \$1.50, postpaid.

**3034 King Edward VII.** The best red sweet pea up-to-date. Such is the verdict, with which we are inclined to agree. The magnificent large flowers are of open form, with a well-shaped round standard. The wings are a trifle brighter in color than the standard; in this respect it resembles *Firefly*. While the color is, perhaps, slightly lighter than *Salopian*, the flowers are larger and borne upon longer stems; there is very little difference in the general tone of color. *Most highly recommended.*

Per pkt. 10 cts.; oz. 15 cts.;  $\frac{1}{4}$  lb. 40 cts.; per lb. \$1.50, postpaid.

**2988 Countess Spencer.** A grand large flower of finest form and most beautiful coloring. This novelty, which is a *distinct innovation* in sweet peas, originated in England with the gardener to the *Countess Spencer*, whose name it bears. The flowers are not only of *extremely large size* and beautifully expanded form, but are distinct from the usual "*grandiflora*" type in having the outer edges of the standard and wings beautifully *crumpled or waved*; the tissue being so full that there is not room for it to lie flatly expanded or smoothly rolled as in other large-flowered kinds. The standard is both broad and tall, stiffly erect and boldly expanded; the wings are broad and well spread and held erect by the keel. The coloring is a silvery white, suffused and tinted with soft rose-pink, which deepens at the outer edges and becomes still deeper and richer or more heavily suffused in cool weather, or where this variety is grown in a cool location. The size, form, and coloring of COUNTESS SPENCER are simply *exquisite* and beyond the power of words to describe. The plant is a strong vigorous grower, and the large flowers come in threes on a long stiff stem. The true seed is very scarce and can be had only in sealed packets, each containing twenty seeds. Per pkt. 25 cts.

See illustration of a spray on page 178, where we offer this remarkable new race of "*Gigantic Orchid-flowered Sweet Peas*" in mixture.

**3046 Mrs. Sydenham.** This is a grand gigantic orchid-flowered seedling of *Countess Spencer*. The color is similar if not identical with that of the popular *Lady Mary Currie* (described on page 154), but the flowers are nearly twice as large and hold true to type of the enormous blooms of this new gigantic-flowered class. It is certainly a most beautiful variety; the rosy-pink wings roll and fold; the standard is reflexed, showing the distinctly fluted effect, and is of a rich salmon-pink color. The flowers produced at height of season measure one and three-quarters to two inches across. The blooms are truly of a *gigantic size*! Sold only in sealed packets, each containing twenty-five seeds. Per pkt. 25 cts.; 5 pkts. for \$1.00.

# The Best New Tall Sweet Peas.

Burpee's New Pink,  
JANET SCOTT,—  
from a Photograph.

## Burpee's

2992 Janet Scott received Award of Merit July, 1904, at the great London Show of The National Sweet Pea Society. This might almost be called a new shade of deep pink with Golden-Gate-shaped wings. The unusual size of the wings, in connection with the large substantial hooded standard, give the flowers an appearance of enormous size. The flowers are considerably deeper and richer in color than the favorite Katherine Tracy, while unlike that variety they are generally borne three on a stem. Per pkt. 10 cts.; oz. 15 cts.; 1/4 lb. 40 cts.; per lb. \$1.50, postpaid.

2982 Burpee's "Dainty." This unique new Sweet Pea has created quite a furore in England as well as in America. Flowers are of largest size and splendid substance, while they are borne three and four, set well at the end of long stout stems. The beautifully formed flowers, upon first opening, appear to be white, but quickly change to "white with pink edge,"—making a most charming contrast. Pkt. 10 cts.; oz. 15 cts.; 1/4 lb. 40 cts.; lb. \$1.50.

Photograph.

Burpee's  
"Earliest of All."

### 3056 Re-selected,—"Extreme-Early."

Mr. Gould, the originator of BURPEE'S EARLIEST OF ALL, has continued to develop the earliness and dwarf habit, until in this RE-SELECTED "EXTREME-EARLY" we have a strain as much earlier than Earliest of All as that variety is ahead of Extra Early Blanche Ferry, which again is earlier than the original Blanche Ferry. The plants of this new strain come into full flower when only twelve inches high and three to four weeks in advance of the first parent variety.

In our Trial Grounds, where the standard varieties of Sweet Peas all came into flower quite early, this "EXTREME-EARLY" was in bloom on June 3d, the regular strain of Earliest of All on June 9th, and Extra Early Blanche Ferry on June 17th. Under less favorable conditions the difference in the period of flowering is even more marked. For winter flowering in the greenhouse it is the VERY BEST of the popular pink-and-white type of flowers. Per pkt. 10 cts.; oz. 15 cts.; 1/4 lb. 40 cts.; per lb. \$1.25.

**Burpee's**

# Other New Tall Sweet Peas.

## 2986 Marchioness of Cholmondeley.

See illustration from a photograph. This is a decided acquisition, being the largest variety, with a beautiful bold erect standard of the true grandiflora type. In color it is very exquisite, being a soft shade of cream overlaid and edged with a delightful shade of pink."—*Henry Eckford*. Per pkt. (of 25 seeds) 10 cts.; ¼ oz. 35 cts.; ½ oz. 65 cts.; per oz. \$1.25.

## 2996 Mrs. Knights Smith.

"This grand new variety is an entirely new shade of pink, quite a refined flower, well advanced in size and nearly a self-color; the standard, which is edged, has a slight inclination to curl, which adds considerably to the dainty appearance of the flower. It is a strong grower, with good stems; beautiful for the table, and will have telling effect on the show bench."—*Henry Eckford*. Per pkt. (of 25 seeds) 10 cts.; ¼ oz. 35 cts.; ½ oz. 65 cts.; per oz. \$1.25.

## 3094 Jessie Cuthbertson.

A very large well-expanded flower, showily striped with rich dark rose on a silvery-white ground. It is a finer flower and even larger than *Mrs. Joseph Chamberlain*; the stripings and flakes of color are more rich and striking in effect. The standard is tall and stiffly erect, with the upper edges slightly rolled or incurved; this, with the slight fold in the center, gives them a pointed effect. The wings are large and lie closely to the keel; they are rolled or incurved at the edges. The ground color of both wings and standard is a creamy white, very boldly striped, and lightly flaked with rich dark rose, most heavily in the wings than on the standard. This is one of the largest and most showy of the distinctly striped varieties. Pkt. 10 cts.; per oz. 35 cts.

**3009 Agnes Johnston.** A bright rose-pink standard, shaded cream; wings cream, slightly flushed with the same bright rose-pink as the standard; a broad, fully expanded flower, of good medium size and fine substance. Of strong growth and constitution. Per pkt. 10 cts.; oz. 15 cts.; ¼ lb. 40 cts.; per lb. \$1.50.

## 3106 Mrs. Walter Wright.

This is one of the largest and finest of the lavender-colored varieties. The flowers are self-colored, of a pinkish cream tint when first opening, changing to mauve and then to a reddish violet when fully opened. The standard is both tall and broad, with the edges heavily rolled; the wings are of the largest size, widely spreading with the outer edges heavily rolled or incurved, and are held nearly erect by the keel. The extra large size, beautiful form, and rich coloring make this a most desirable addition. Per pkt. 10 cts.; oz. 20 cts.; ¼ lb. 50 cts.; per lb. \$1.75, postpaid.

## 3114 Flora Norton.

This is a beautiful rich light lavender, entirely free from any mauve or pinkish tinge. It is described by the originator as "a bright blue." The flowers are large and of fine form, borne three on a stem and all facing one way. We think it will prove to be one of the most delicate and pleasing shades for florists' use as a cut-flower. Per pkt. 10 cts.; per oz. 35 cts.

## 3116 Mrs. Geo. Higginson, Jr.

This charming shade is described by the originator as a sky-blue. At FORDHOOK, the past summer, we found it to be a very delicate lavender and entirely free from any pinkish or mauve tint. The flowers are of fair size and fine open form, coming in threes on a good stem. Per pkt. 10 cts.; per oz. 35 cts.

"SUNBEAMS."

COPYRIGHT—1908—  
WATLEE BUNDE & CO.  
MARCHIONESS  
OF CHOLMONDELEY.

## 2976 Burpee's Earliest Sunbeams.

This might be described as a primrose "Mont Blanc!" This one statement will make it eagerly sought for by commercial florists, as with the famous *Burpee's Earliest of All* it now gives a third color in this distinct class of extremely early Sweet Peas for forcing. It is equally desirable also for early spring flowering in the open ground, particularly in sections where the later sorts are apt to be cut off by extreme summer heat.

The flowers are of a rich primrose color, and generally borne three on a stem; stems strong and of good length for cutting. The plant is comparatively dwarf growing,—exactly of same habit as *Mont Blanc*, of which it is a duplicate except in color. Unfortunately the crop of seed is very short. Per pkt. (40 seeds) 15 cts.; 2 pkts. for 25 cts.; 10 pkts. for \$1.00.

# Burpee's Best Tall SWEET PEAS.

## White.

- 2955 MONT BLANC (Benary's).** Of dwarf growth and extremely early flowering habit. The flowers are a pure paper-white, slightly smaller than those of *Emily Henderson*. The best white for growing under glass during winter. Per  $\frac{1}{4}$  lb 25 cts.; lb 75 cts.
- 2957 JOSEPHINE WHITE.** As early as *Mont Blanc*; taller growing, with longer stems but flowers not so well formed. Per  $\frac{1}{4}$  lb 25 cts.; per lb 75 cts.
- 2959 EMILY HENDERSON.** Large bold flowers, produced profusely; earlier but not so refined in form, nor so large as *Blanche Burpee*.
- 2961 BLANCHE BURPEE (Eckford's).** A grand large flower of beautiful form; firm, lasting substance and snowy whiteness, having three of the extra large flowers on each long stiff stem, and all facing one way. Vines are of strong growth, blooming profusely.
- 2965 SADIE BURPEE.—White-Seeded (Eckford's).** Flowers are of the largest size and purest snowy white. The difference from *Blanche Burpee* is in the taller standard, which is also more completely hooded. The large flowers come in threes.
- 2966 SADIE BURPEE.—Black-Seeded (Eckford's).** The flowers, while equally as large, show a delicate pink flush in the standard when first opened. This slight variation in color, however, is amply compensated in the greater hardness.
- 2968 WHITE WONDER (Burpee's).** The flowers are pure white, uniformly of the largest size, and are frequently borne six to eight on a long stout stem. The flowers are well placed near top of stem and generally all facing one way. The vines bloom profusely, being of unusual vigor.  $\frac{1}{4}$  lb 25 cts.; lb 90 cts.

## Cream or Light Yellow.

- 2969 COQUETTE.** Flowers of a deep primrose, shaded with lavender in the standard. Large size.
- 2973 LADY M. ORMSBY-GORE.** Standard primrose, delicately shaded (or overlaid) with buff and fawn; wings clear primrose. Of very vigorous growth, the large hooded flowers are borne profusely.
- 2975 MRS. ECKFORD.** Quite large size. A beautiful shade of light primrose-yellow; fine for cut-flowers.
- 2977 QUEEN VICTORIA.** Color a soft primrose-yellow, slightly overlaid with faint purple.
- 2978 SUE EARL (Burpee's).** The standard is primrose, with mauve at edges; wings almost pure primrose, with only a suggestion of light mauve. The last blossom produced at top of stem *always remains of a clear primrose*, while the other flowers become later of a deep mauve. Per  $\frac{1}{4}$  lb 25 cts.; per lb 75 cts.
- 2979 THE HON. MRS. E. KENYON.** A beautiful primrose color, a bold giant flower. This can be described as an *enlarged and improved Mrs. Eckford*. Per  $\frac{1}{4}$  lb 25 cts.; per lb 75 cts.
- 2981 STELLA MORSE (Burpee's).** Has a faint tinge of pink underlying the cream, producing a true apricot shade; most beautiful for bunching.

## Very Light Blush.

- 2983 MODESTY (Burpee's).** In strong sunlight it is seemingly a silvery white, but the suffused pink tint is clearly shown on closer examination.
- 2985 SENSATION (Burpee's).** Of delicately silky-white texture, suffused with faint blush-pink; wings semi-erect and well rolled.

## Light Pink.

- 2987 COUNTESS OF LATHOM.** A soft cream tint heavily shaded with soft flesh-pink in the center of the standard and wings, shading much lighter at the edges. This rich tinting gives a *coppery-rose effect*.
- 2989 CROWN JEWEL.** Standard suffused with rosy violet; wings creamy white, slightly tinted with rose.
- 2990 JEANIE GORDON.** The standard is of a bright rose color, shaded cream, slightly hooded wings, creamy suffused rose. Large flowers; similar to the beautiful *Crown Jewel*, but on a *cream ground*. Per  $\frac{1}{4}$  lb 25 cts.; per lb 75 cts.
- 2991 ELIZA ECKFORD.** Standard flesh-pink, suffused with silvery white; wings white, occasionally suffused with soft pink. Per lb 50 cts., postpaid.
- 2993 KATHERINE TRACY.** Soft rosy pink, lighter at edges. A fine large flower and of strong vigorous growth, but comes only two on a stem. Per lb 50 cts.
- 2995 LOVELY.** The most beautiful shades of soft shell-pink, changing to very light rose at the outer edges. Grand flowers of large size, aptly named "*Lovely!*"

See also Colored Plate, page 118.

## Deeper Shades of Pink.

- 2997 APPLE BLOSSOM.** Standard heavily shaded and edged with soft rose on silvery white; wings white with deep rose in center. Per lb 50 cts.
- 2999 BLUSHING BEAUTY.** Soft rose-pink, delicately suffused on a silvery-white ground; might be called a "*peach-blossom*" tint. Per lb 50 cts.
- 3000 GRACIE GREENWOOD.** "Beautiful soft cream, shaded delicate pink, with a distinct edging of deeper pink." Per  $\frac{1}{4}$  lb 25 cts.; per lb 75 cts.
- 3001 PRIMA DONNA.** A most beautiful bright shade of blush-pink. Flowers of large size and finest form.
- 3003 ROYAL ROBE.** Standard rich flesh-pink; wings soft carmine-rose; flowers of medium size.
- 3005 ROYAL ROSE.** Extra large and extremely beautiful; semi-hooded form. Standard crimson-pink, deepening at center; wings pink.
- 3007 TRIUMPH.** Standard erect, broadly expanded; creamy white, suffused with salmon-pink, and tinged with carmine at the base; wings shaded with rosy carmine, deepening to rich rose.

## Tall SWEET PEAS,—Continued.

Your choice of all these:

5 Cts. per Packet; any Seven  
Packets for 25 Cts.

10 Cts. per Ounce; any  
Four Ounce-Packages  
for 25 Cts.

The above rate is net  
and not subject to any  
further discount as  
"seeds in packets."

In larger quanti-  
ties, except where other-  
wise priced, all these are  
20 cts. per ¼ lb.; 60 cts.  
per lb., postpaid.  
By express or freight, 50  
cts. per lb.

MISS WILLMOTT.

LORD ROSEBERRY

### Rich Shades of Rose.

**3011 AMERICAN QUEEN (Burpee's).** The standard is extra large, of unusual height erect and pointed at top; color a clear "salmon-red," the large wings being of a bright deep rose.

**3013 COLONIST.** Color a rich glowing rosy pink, with softer and deeper rose shadings in the wings.

**3015 FASHION (Burpee's).** Large flowers borne on long stiff stems. The coloring is a soft shade of rose-magenta, spread over the whole flower.

**3017 HER MAJESTY.** Large, finely hooded flowers of beautiful soft rose, deep and glowing. Per lb 55 cts.

**3019 LORD KENYON.** A fine large flower, three on a stem, self-colored, bright rose-pink, shaded with distinct richly-colored veinings. Standard large and quite tall, rather pointed; the wings are held nearly erect by the large stiff keel.

**3020 LORD ROSEBERRY.** "A self-colored rosy magenta, of fine form and substance, very free flowering and robust." We are much pleased with this richly colored variety. The large hooded flowers, borne on long stems, are of a *rose-carmine*, showing veins of deeper rose. See illustration from photograph on page 156. Per ¼ lb 25 cts.; per lb 75 cts.

**3021 MAJESTIC (Burpee's).** Borne almost uniformly three on a stem, and all facing one way; the flowers are of largest size and perfect form, slightly hooded. Standard is a deep rose-pink, while wings are also deep rose but rather softer in tone. Per pkt. 5 cts.; oz 10 cts.; ¼ lb 25 cts.; per lb 75 cts.

**3023 MRS. DUGDALE.** One of the largest-flowered of all, coming uniformly three on a stem. The large standards are of an incurved or shell-like form. The standard is of a light carmine-rose with faint markings of primrose; wings of the same tint. They hold the color well when fully opened.

**3025 PRINCE OF WALES.** A grand large flower in a bright self-colored deep-rose tint. The flowers are beautifully hooded and come frequently four on a stem. It might be called an improved *Her Majesty*.

### Red and Scarlet.

**3027 BRILLIANT (Burpee's).** A very bright crimson-scarlet. Standard broad and slightly hooded.

**3029 COCCINEA.** A distinct new color and "a beautiful thing,"—although the flowers come only two on a stem and are not extra large. They are self-colored in a bright rich cherry, intensely brilliant and decidedly new. Per ¼ lb 25 cts.; per lb 75 cts.

**3031 FIREFLY.** The favorite bright scarlet variety until the introduction of *Brilliant* and *Salopian*.

**3033 GEORGE GORDON.** Of large size and hooded form. It is claret-red, self-colored, but turns to a dull purple with age.

**3035 MARS.** An intense glowing scarlet of grandiflora form; wings heavily suffused with rose.

**3037 PRINCE EDWARD OF YORK.** Flowers of extra large size and boldly expanded form; standard is a bright glowing scarlet bordering on salmon, while the broadly spreading wings are soft deep rose.

**3039 SALOPIAN (Burpee's Improved "Sunproof").** This has been the *finest scarlet*,—until introduction of the Novelties now shown on our *Colored Plate*. Flowers, of largest size and finely hooded form, are borne uniformly three on a stem.

### Shades of Orange and Salmon.

**3043 GORGEOUS (Burpee's).** Standard erect; richly suffused with deep salmon-orange. Wings large and heavily suffused with an orange-salmon or deeper shade. The coloring is intensely brilliant.

**3045 HON. F. BOUVERIE.** Soft pinkish salmon at base of the standard; wings shade to a lighter salmon-buff at the edges. A most charming variety that might be aptly described as a deep rich pink *Venus*.

**3047 LADY MARY CURRIE.** The best of the rich orange-tinted varieties, excepting only the new *Miss Willmott*; standard large, heavily veined with salmon-pink and shaded in lower portion with carmine; wings large, recurved, and of a soft rose-pink, veined with a deeper shade bordering on buff.

**3049 MISS WILLMOTT.** The extra large standard measures one and one-fifth to one and three-quarter inches across, and is of the richest orange-pink, delicately shaded rose; wings also orange-pink. The enormous flowers are borne erect upon stiff stems from twelve to sixteen inches long. Superior both in size and richness of coloring to the popular *Lady Mary Currie*. ¼ lb 25 cts.; per lb 75 cts.

**3051 ORIENTAL (Burpee's).** Very large finely formed flowers of a bright orange-salmon, heavily veined with a deeper shade. Might be described as an improved *Lady Penzance*.

**3053 VENUS.** Lovely salmon-buff, shaded with rosy pink. The fine large flowers become deeper in shade as they remain open.

### "Pink and White."

**3057 BURPEE'S EARLIEST OF ALL.** A new and entirely distinct strain developed from the *Extra Early Blanche Ferry*, growing only eighteen to twenty-four inches in height when in full bloom. It flowers *fully ten days in advance of Extra Early Blanche Ferry*, bearing a rich profusion of the beautifully tinted flowers. Standard bright rosy pink; wings creamy white, suffused with pale rose. Planted under glass early in September the vines grow two feet in height, beginning to bloom by the middle of November,—a most desirable feature for florists.

**3059 EXTRA EARLY BLANCHE FERRY.** An improved strain of the very popular *Blanche Ferry*, beginning to flower fully a week earlier. Per lb 50 cts.

**3061 BLANCHE FERRY.** Standard wide and erect, bright rose-pink; wings creamy white, tinted with rose. ¼ lb 15 cts.; per lb 45 cts.

### "Blue and White."

**3065 LOTTIE ECKFORD.** Large silvery-white flowers, beautifully shaded and edged with soft lavender.

**3067 MAID OF HONOR (Burpee's).** The flowers are beautifully shaded with light blue on a white ground and edged with narrow border of deep rich violet; very dainty. Far superior to *Butterfly*.

### Claret and Maroon.

- 3039 BLACK KNIGHT.** Standard wine-brown or dark claret; wings heavily shaded with brownish purple.
- 3071 DUKE OF CLARENCE.** A deep rich tint of rosy claret bordering on purple-maroon.
- 3073 DUKE OF SUTHERLAND.** Standard of a deep claret with strong reddish tinge, deepening to rich purple; wings of a deep violet-purple.
- 3075 DUKE OF WESTMINSTER.** Grand large flowers; a beautiful shade of rosy claret.
- 3077 OTHELLO.** A deep maroon self-color; very large size; standard slightly hooded, widely expanded, and of grand hooded form. ¼ lb 25 cts.; lb 75 cts.
- 3079 SHAHZADA.** Intensely dark maroon, with a tint of purple in standard and inner portion of wings; rich.
- 3081 STANLEY.** Rich, dark, glossy flowers of large size, self-colored in darkest maroon of burnished tint.

### Striped and Variegated.

- 3083 AMERICA.** Heavily striped with bright blood-red on silvery-white ground; showy. Per lb 50 cts.
- 3085 AURORA (Burpee's).** Flowers of extra large size, three on a stem. Both standard and wings beautifully flaked with bright orange-salmon on a creamy-white ground. The finest of all striped Sweet Peas.
- 3086 "GOLDEN-ROSE" (Burpee's).** Received Award of Merit from the National Sweet Pea Society of England, in July, 1902. The flowers are extra large in size, of fine open form, with standard gracefully fluted. The ground color is a clear primrose-yellow, beautifully flushed with rosy pink—making a color combination which is most attractive. Per ¼ lb 25 cts.; per lb 85 cts.
- 3087 GRAY FRIAR (Burpee's).** A most charming variety, heavily shaded with watered purple markings on creamy-white ground. Per lb 50 cts.
- 3089 JUANITA (Burpee's).** Broadly striped markings of light lavender on a creamy-white ground.
- 3091 LOTTIE HUTCHINS (Burpee's).** Flaked and striped with light pink on a rich creamy ground.
- 3095 MRS. JOS. CHAMBERLAIN.** Ground color is a clear silvery white, brightly striped soft rosy pink with most attractive effect.
- 3097 PINK FRIAR (Burpee's).** The coloring is a soft carmine-rose, suffused on a silvery or crystalline white ground in finely watered markings.
- 2099 RAMONA (Burpee's).** Creamy white, splashed or striped with pink in both standard and wings.
- 3101 SENATOR.** Purplish maroon, heavily striped on a white ground. Darkest striped variety.
- 3103 WAWONA (Burpee's).** The lovely flowers are of a delicate *heliotrope*, beautifully striped with faint creamy white; they are of large size and finest form.

### Lavender and Light Blue.

- 3105 ADMIRATION (Burpee's).** A grand large flower of beautiful form and self-colored in a delicate shade of rosy lavender. The great freedom of bloom combined with the delicate coloring render this one of the very choicest varieties,—blending finely with the deeper shades.
- 3107 COUNTESS OF RADNOR.** Fine size and form. A beautiful shade of light lavender with faint purplish tinge on the standard. Per lb 50 cts., postpaid.
- 3109 DOROTHY TENNANT.** Self-colored in a rich shade of rosy mauve. Flowers of large size and good form, retaining the attractive coloring when fully expanded.
- 3111 GOLDEN GATE (Burpee's).** Blended shadings of pinkish mauve and lavender; stiffly upright wings.
- 3113 LADY GRISEL HAMILTON.** Most attractive light lavender shading; flowers of best hooded form and extra large size, even larger than those of *Burpee's New Countess*. Standard light lavender with azure-blue wings; very light and dainty in effect. Per ¼ lb 25 cts.; per lb 75 cts.
- 3115 LADY NINA BALFOUR.** The flowers are of largest expanded form with beautiful hooded standard. The coloring is a delicate light lavender or lilac, closely approaching the lovely shade known as "mouse-colored."
- 3117 NEW COUNTESS (Burpee's).** An improved *Countess of Radnor*, in which is eliminated the reddish cast in standard, the flowers being a clear light lavender. The shade is very attractive when seen in a large bouquet composed solely of this variety.

### Blue and Purple.

- 3119 CAPTAIN OF THE BLUES.** The flowers have the appearance of being a true blue, but examination shows that standard is purplish mauve, while wings are lavender-purple; bright and attractive.
- 3121 CAPTIVATION.** The flowers are large and of a deep magenta shade.
- 3123 COUNTESS CADOGAN.** The large flowers, when first opening, resemble those of *Captain of the Blues*, but soon change to a light bluish purple in standard and clear blue in wings. The color effect is that of a *bright blue*; very attractive. Per ¼ lb 25 cts.; per lb 75 cts.
- 3125 EMILY ECKFORD.** Flowers of large size; standard light rosy purple; wings rich deep blue.
- 3127 FASCINATION.** A very large flower, coming three to a stem. The flowers are self-colored in a rich mauve or rosy-lavender tint.
- 3129 NAVY BLUE (Burpee's).** The large flowers are of a deep glowing violet-purple, having the effect of a *dark navy blue*, although on close examination the standards show a faint tinge of claret or wine-red. The flowers are practically self-colored, and the deep rich coloring is grandly effective either alone or when in a combination with other colors. Flowers are much darker than those of *Countess Cadogan*. Per ¼ lb 25 cts.; per lb 75 cts.

# BURPEE'S DWARF Cupid Sweet Peas.

Plants are seldom more than six inches in height and form a dense mat of richest green foliage fifteen inches or more in diameter. The flowers are *fully equal in size* to those of the tall-growing varieties, but are placed closely together, generally three or four at the top of a short stiff stem. The close-spreading growth lying on the surface of the soil serves to keep the latter cool and moist, protecting it from the burning rays of the sun. By reason of this close dense growth, these Cupid varieties have not always proved so successful when planted where the tall varieties grow most luxuriantly; the close growth of foliage does not dry out so quickly after heavy rains as the tall sorts, which are supported on brush and exposed to the drying influence of the air. For light dry soils, however, where the tall sorts quickly dry up or are injured by blight and insects, **CUPID SWEET PEAS** give the greatest satisfaction. Protracted dry weather induces them to grow with vigor and flower most freely. In dry locations, the seed may be sown rather thickly in a drill, as with other sorts, and the plants allowed to grow in a close compact row, forming a beautiful ribbon or border of dark rich green, thickly starred with the brightest blossoms. For heavier moist soils we recommend planting in slightly elevated beds and having the plants stand ten inches or more apart. **With your order, ask for LEAFLET ON CULTURE.**

DWARF SWEET PEA, —“CUPID.”

- 2341 AMERICA CUPID.** The standard and wings are very broad, showing effectively the bright blood-red stripings on silvery-white ground. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 25 cts.; per lb 75 cts.
- 2343 ALICE ECKFORD CUPID.** Standard is silvery white with faint stripe of rose in center and shadings of soft rosy pink at the base; wings white. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 25 cts.; per lb 75 cts.
- 2345 APPLE BLOSSOM CUPID.** The standard is suffused with deep rose on a silvery ground; wings are shaded in the center with soft rose. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 25 cts.; per lb 75 cts.
- 2347 BOREATTON CUPID.** Standard a rich wine-brown with a satin-like finish. Wings deep mauve. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 25 cts.; per lb 75 cts.
- 2349 BRIDESMAID CUPID.** Standard and wings of a very deep pink throughout. The large standard is semi-hooded and the wings are unusually large. A most prolific bloomer. Per pkt. 10 cts.; oz. 15 cts.;  $\frac{1}{4}$  lb 40 cts.; per lb \$1.25.
- 2351 BURPEE'S BEAUTY CUPID.** Standard rich rose-pink, shading to nearly white at the edges. Wings suffused rosy carmine, deepening at the edges. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 25 cts.; per lb 75 cts.
- 2353 CAPTAIN OF THE BLUES CUPID.** The standard is of a reddish-purple tint, heavily suffused with violet; wings very large, of a rich violet-purple. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 25 cts.; per lb 75 cts.
- 2355 CHAMBERLAIN CUPID.** The gigantic flowers, borne in clusters upon stiff stems, are beautifully striped rosy pink upon white ground. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 30 cts.; per lb 90 cts.
- 2357 COUNTESS OF RADNOR CUPID.** Light lavender flowers of immense size, even larger than those of the tall Countess. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 25 cts.; per lb 75 cts.
- 2359 ENCHANTRESS CUPID.** Generally three flowers on each stout stem; rose-pink on rich cream ground. The rose-pink is deepest in color at base of standard. Per pkt. 10 cts.; oz. 15 cts.;  $\frac{1}{4}$  lb 40 cts.; per lb \$1.25.
- 2361 EXTRA EARLY BLANCHE FERRY CUPID.** The flowers are identical with those of *Pink Cupid*, but come into full bloom a week or ten days earlier. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 25 cts.; per lb 75 cts.
- 2363 FIREFLY CUPID.** The large flowers have the dazzling scarlet effect of *Firefly* and seem even more intense in color. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 25 cts.; per lb 75 cts.
- 2365 HER MAJESTY CUPID.** The flowers are the same in form and coloring as those of the tall *Her Majesty*, and are even *larger in size*. The soft shade of rosy crimson is slightly deeper in the wings than in standard. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 25 cts.; per lb 75 cts.
- 2369 LOTTIE ECKFORD CUPID.** Both standard and wings are clear silvery white, edged with rich purple-lavender, with fainter shadings of the same color frequently shading the inner portions. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 30 cts.; per lb 90 cts.
- 2371 MAUVE QUEEN CUPID.** Practically self-colored, being deep pinkish mauve upon primrose ground, with wings only a shade lighter than the standard. Per pkt. 10 cts.; oz. 15 cts.;  $\frac{1}{4}$  lb 40 cts.; per lb \$1.25.
- 2373 PINK CUPID.** This grand variety has the bright pink-and-white flowers of the *Blanche Ferry* type. The wings are lightly suffused with faint rose. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 25 cts.; per lb 70 cts.
- 2377 PRIMROSE CUPID.** Of a rich creamy or primrose tint. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 25 cts.; per lb 70 cts.
- 2381 ROYALTY CUPID.** This resembles the tall *Royal Rose*, but the coloring is of *deeper and richer pink*. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 25 cts.; per lb 75 cts.
- 2383 SADIE BURPEE (b. s.) CUPID.** This will completely eclipse the original *White Cupid*, and being *black-seeded* is of vigorous growth. The standard measures *nearly two inches across* while the wings spread out,—giving the flowers an appearance of *really gigantic size*. The expanded flowers are uniformly of pure *pearly whiteness*. Per pkt. 10 cts.; oz. 15 cts.;  $\frac{1}{4}$  lb 40 cts.; per lb \$1.25.
- 2385 STELLA MORSE CUPID.** The ground color is a rich creamy buff, tinted with apricot, while the inner portion of the wings is delicately shaded with soft rosy carmine. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 25 cts.; per lb 75 cts.
- 2389 WHITE CUPID.** The first of this new “CUPID” dwarf race; a white-seeded white. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 25 cts.; per lb 70 cts.

## So-called “Double” Sweet Peas.

After continued careful selections over a period of years we are free to confess that we think these “Double” Sweet Peas *ought to be discarded*. They never produce more than thirty per cent. of so-called “double” flowers,—and these are not nearly so attractive as the large-flowered single varieties. As they are largely advertised, however, we continue to supply the ten separate colors or **3185 All Colors Mixed**, each at: Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 25 cts.; per lb 75 cts.

## Curious “Snapdragon” Sweet Peas.

In this distinct class the flowers seemingly remain in a bud-like form; that is, the standard closely overlaps the wings. We offer **3187 RED RIDING HOOD**, of a soft rosy pink;—**3189 ORIGINAL “SNAPDRAGON,”** creamy white, tipped with bright rose;—**3191 PINK**, of a lovely soft *shell-pink*, frequently five flowers on a stem;—**3193 WHITE**, the flowers are snow-white throughout. Each of these are 5 cts. per pkt.; 10 cts. per oz.

“SNAPDRAGON.”

# New Race of Burpee's Bush Sweet Peas.

BURPEE'S NEW BUSH SWEET PEA.

This new race, introduced in 1899, has proved very satisfactory in growth and freedom of bloom, particularly in light warm soils. The plants are erect; fifteen to eighteen inches high when in full flower, but branching freely so that the close bushes are frequently fifteen inches and more in diameter, composed of short erect branches with abundant light green foliage. The tendrils at ends of the leaves clasp themselves closely to the adjoining branches, so that the whole plant is generally held quite erect, though sufficiently open to admit of a freer circulation of air than in the compact form of the Cupid type. The flowers, while little more than half the size, are of as fine form and beautiful coloring as the tall varieties, and are borne on long slender stems. As the stems of flowers can be cut with some of the neat attractive foliage, they are most desirable for bunching in bouquets and for floral decorations.

**2397 Burpee's Bush Sweet Pea,—“Blanche Burpee.”** The flowers are of the pure paper-whiteness, fine bold form, and firm lasting substance as in the famous tall *Eckford's Blanche Burpee*, but average about two-thirds the size. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 30 cts.; per lb 90 cts.

**2399 Burpee's Bush,—“Blanche Ferry.”** Plants of true bush growth, with a profusion of fine large flowers of the ever-popular coloring, pink-and-white, as seen in tall *Blanche Ferry*, *Burpee's Earliest of All*, and *Pink Cupid*. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 25 cts.; per lb 75 cts.

**2400 Bush,—Dorothy Tennant.** This is quite *self-supporting* when grown in a row. The flowers are self-colored, in handsome rose-purple; of medium large size, hooded form, of the best type. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 30 cts.; per lb \$1.00.

**2401 Bush,—“Firefly.”** As brilliant a scarlet as the tall *Firefly*, while, when cut with some of the neat foliage attached, it is particularly useful in bouquets. Per pkt. 10 cts.; oz. 15 cts.;  $\frac{1}{4}$  lb 40 cts.; per lb \$1.50.

**2403 Bush,—“Gaiety.”** Flowers smaller than the tall *Gaiety*, but equally as brightly spotted—scarlet on white. Per pkt. 10 cts.; oz. 15 cts.;  $\frac{1}{4}$  lb 40 cts.; per lb \$1.50.

**2405 Bush,—“Gray Friar.”** The coloring, in suffused shadings and watered veinings, is of lavender-purple on a silvery-white ground, like the popular tall *Gray Friar*. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 25 cts.; per lb 75 cts.

**2407 Bush,—“Her Majesty.”** The color is a rosy crimson, both in the standard and wings, very bright and soft in tint—a truly charming shade. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 30 cts.; per lb 90 cts.

**2408 Bush,—Lady Mary Currie.** This is certainly one of the very best bush sweet peas, blooming most profusely. The standard is bright crimson-orange; wings crimson, shaded with orange. Per pkt. 10 cts.; oz. 15 cts.;  $\frac{1}{4}$  lb 40 cts.; per lb \$1.25.

**2409 Bush,—Lottie Eckford.** Standard white ground, quite heavily shaded throughout with lilac; wings similar but shaded with lighter lilac. Both standard and wings are *edged with deep blue*. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 30 cts.; per lb \$1.00.

**2413 Bush,—“Monarch.”** Standard of a deep claret or wine-brown; wings heavily rolled, rich purple. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 25 cts.; per lb 75 cts.

**2417 Bush,—“Prima Donna.”** The flowers are the most exquisite shade of flesh-pink. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 30 cts.; per lb \$1.00.

**2418 Bush,—Royal Rose.** The beautiful semi-hooded flowers are larger than usual in this distinct new type. Standard crimson-pink, shading deeper at mid-rib; wings pink, shading lighter at edges. Per pkt. 10 cts.; oz. 15 cts.;  $\frac{1}{4}$  lb 40 cts.; per lb \$1.25.

**2419 Bush,—“Sadie Burpee” (b. s.).** Well-formed showy white flowers, identical with the tall *black-seeded Sadie Burpee*, but smaller in size. The seed germinates as readily. Per pkt. 10 cts.; oz. 15 cts.;  $\frac{1}{4}$  lb 40 cts.; per lb \$1.50.

**2421 Burpee's Bush,—“Senator.”** Standard and wings are silvery gray, heavily striped with brownish claret, changing to a violet-purple as flowers remain open. Per pkt. 5 cts.; oz. 10 cts.;  $\frac{1}{4}$  lb 25 cts.; per lb 75 cts.

**2425 Burpee's Bush Sweet Peas in Mixture.** This new mixture embraces all the above and also *forty other colors*, which are not offered separately. Per pkt. 5 cts.; per oz. 10 cts.;  $\frac{1}{4}$  lb 30 cts.; per lb 90 cts., postpaid.

PETER HENDERSON & CO.

The  
Gigantic New  
SWEET PEA,  
**Countess Spencer.**  
The Most Beautiful Variety  
Ever Raised.

**Countess Spencer.** One of the most beautiful Sweet Peas ever raised. A healthy, vigorous grower, producing abundantly long, strong-stemmed flowers of splendid substance and of truly gigantic size, measuring, when well grown,  $1\frac{1}{2}$  to 2 inches across the standard. The latter is round, full and gracefully wavy, standing boldly upright—a typical “look-you-in-the-face” flower. The coloring of the entire flower is a charming harmony in shell-pinks, the high lights of warm blush with rose-pink tintings in the depths of the undulations. As a cut flower for bunching, for vases, for corsage wear, etc., it is unusually attractive and often preferred to the exclusion of all other Sweet Peas. “Countess Spencer” sports somewhat in coloring; perhaps 10 per cent. of the plants will produce flowers of deep rose, orange-pink, blush-white, etc., but all of the same open form and large size and all highly desirable. This variation is possibly caused by the open keel which is a unique characteristic of this variety, thus slightly exposing the pollenizing organs and facilitating natural hybridization, so that in the near future we may look for other colors in this grand type. Per pkt. of 30 seeds, 15c.

**PETER HENDERSON & CO**

## New Sweet Peas for 1905.

**Agnes Johnson.** An "Eckford variety" of large size and best form, with broad, fully expanded standard. Originator's description: "bright rose-pink, shaded cream, etc.," but our trial notes call it "buff-pink, an improved large-flowering Venus." Per pkt. of 50 seeds, 10c.; oz., 25c.

**Dorothy Eckford.** The white Sweet Pea of the future, surpassing all other whites 25 per cent. in size. Stems extra long and stiff, carrying usually two, and occasionally three, flowers, not only of gigantic size but of good substance and grand open form, the standard curling in but very slightly. The white is purity itself, showing no tendency of pinkish tinge; very floriferous. Per pkt. of 50 seeds, 10c.; oz., 25c.

**Domino.** Very novel and striking; large, long-stemmed flowers with round, upright standards, slightly curled at the edges. Coloring, pearl-blush speckled with carmine dots and a shaded marginal zone of carmine-pink; back of flower heavily dusted and shaded with madder-rose; good grower and free bloomer. Per pkt. of 30 seeds, 15c.

**Gladys Unwin.** A new English Sweet Pea that we have not seen in flower, but it comes from an unimpeachable source with the following description: "Gladys Unwin" has a very large and bold flower, not hooded, but with a very striking upright crinkled or wavy standard and broad wings. Color, a pale rosy-pink. A striking feature is that about 75 per cent. of the long flower stems are with *four blooms*, which is a most unusual thing in Sweet Peas. It was raised in 1901 and has remained perfectly true and fixed in character. For market growers especially it cannot be surpassed, being just the lovely pink color which is so in demand. Mr. Unwin, the raiser, sent a large quantity of cut bloom to Covent Garden Market this last June and July, where it realized higher prices by far than any other variety." Per pkt. of 25 seeds, 25c.

**Gladys Deal.** A most beautiful, pure lavender-blue, of light silvery effect, entirely free from the rosy-magenta tinge so usual in varieties of this color. A good-sized flower with round open standard. Per pkt. of 30 seeds, 15c.

**Jessie Cuthbertson.** A large flower of the improved form with immense round, open standard. Color, cream-white, strongly striped with red. Three and often four flowers are borne on strong long stems; an improvement in shape and size on "America." Per pkt. of 30 seeds, 10c.

**King Edward VII.** A grand, large flower with round, open standard. Color, a rich blood-scarlet; standing the sun without browning. A healthy grower, flowers freely on long strong stems. Will eventually displace the older crimson sorts. Per pkt. of 50 seeds, 10c.; oz., 25c.

**Marchioness of Cholmondeley.** A decided acquisition; the true grandiflora type with boldly erect, round standard. Color, an exquisite shade of cream-pink, shaded buff-pink. Per pkt. of 20 seeds, 15c.

**Mrs. Knights Smith.** A fine large-flowering variety with large open standard. Color, rose-pink, deepening towards the edge. Our trial ground notes suggest that it might have been a selection out of "Countess Spencer." Per pkt. of 20 seeds, 15c.

**Mrs. Walter Wright.** A very large-flowering variety, with broad, round standard curled in somewhat at the edges. Color, rosy-mauve with bluish-mauve wings; similar in color to "Dorothy Tennant," but a larger flower. Per pkt. of 50 seeds, 10c.; oz., 25c.

**Phenomenal.** A decided novelty of great merit; entirely distinct from any other Sweet Pea. The flowers are of unique construction; the standards, borne in pairs, are large, full and frilled; the wings are also large and wavy. The coloring is pearl-white delicately tinted with rosy-lavender. The size of the flowers, healthy growth, freedom of bloom, charming coloring and novel form combine in making this a highly desirable variety. Per pkt. of 50 seeds, 15c.; oz., 30c.

**Scarlet Gem.** A great advance in color, a distinctive, bright clear scarlet, with almost the brilliancy and tone of a scarlet geranium; the color also holds up well under our hot sun. The plant is of strong growth and very free flowering; the flowers are large though not gigantic in size; borne on strong stems a foot long, usually three to a stem. Per pkt. of 20 seeds, 15c.

**White Wonder.** A variety of unique characteristics. A large proportion of the flower stems are double, that is, grown together side by side; in consequence, they are long and extra stiff and usually carry six to eight purest white flowers of the largest size, frequently all facing one way, while one or two of the flowers on a stem come double. As a cut flower for vases, etc., it is of especial value. The plants are of unusually vigorous growth and bloom very freely. Per pkt. of 50 seeds, 10c.; oz., 25c.

# HENRY A. DREER · PHILADELPHIA · PA.

## VARIOUS VERBENAS.

4366 **Lemon Verbena** (*Aloysia Citriodora*). Every garden should have a few plants of this fragrant favorite. Its pale green foliage goes well with any flower. . . . . 10

4365 **Erinoides** (*Moss Verbena*). This lovely variety produces a mass of moss-like foliage, spreading over the ground like a carpet, above which are borne heads of purplish-blue blossoms in lavish profusion; comes into flower in June and continues until frost. For beds, baskets or rockeries it is highly desirable. . . . . 10

4364 — **alba**. A charming white variety. . 10

4367 **Venosa** (*Hardy Garden Verbena*). This variety is large-

ly used for bedding purposes. It is a strong, thrifty grower, is about one foot high and covered from early summer until late fall with its bright purplish-heliotrope flowers. . . . . 5

## VAUGHAN'S

### VERBENAS.

Verbenas are one of our best annuals, and by many people are preferred to the Phlox, Aster or Pansy. Nothing is easier to grow, and the display they give during the Summer is equalled only by the Phlox. Sow them early and they will bloom for you constantly from June until frost time.

**1706—Pink and Carmine Shades.** This new mammoth strain embraces remarkably lovely tints from light and dark rose to deep carmine. The flowers are of exceptionally large size, and are borne in splendid trusses. **Pkt., 10c.**

**1707—Firefly.** A mammoth Verbena, which comes quite true from seed, and is entirely distinct by its grand trusses of brilliant red flowers with large pure white eye. **Pkt., 15c.**

**1709—Mayflower.** This is of the same trailing habit as the Arbutus or Mayflower, its branches creeping over the ground and hugging it closely. Its blossoms are of the same shape and about the same size. The new Verbena Mayflower has all these characteristics, with the additional merit of possessing the same lovely and delicate coloring, making its flowers closely like the Arbutus; and, last, it has the same exquisite fragrance. **Pkt. (75 seeds), 10c.; 3 for 25c.**

## BURPEE'S

### 2623 Verbena, —Mayflower.

Burbank's Mayflower, or Fragrant Verbena, is brightly colored in most pleasing shades of pink. In nearly all strains of seedling verbenas some few plants will have a much richer and stronger fragrance than others, and by saving seed only from the most fragrant flowers and again selecting from these for size and bright colorings, Mr. Burbank has developed a strain in which the flowers are of extra large size, most lovely shades of pink, and more fragrant than in any other strain. **Per pkt. 10 cts.**

MAYFLOWER  
VERBENA.

## ZINNIA "JACQUEMINOT."

Our bed of this brilliant Zinnia at the St. Louis Exposition was awarded a Silver Medal.

4442 This splendid variety belongs to the double dwarf section, and forms fine bushy plants about 18 inches high, bearing in countless numbers throughout the entire season handsome perfectly double flowers of a vivid and velvety rich scarlet-crimson. 10 cts. per pkt.; 3 pkts. for 25 cts.

Our bed of Zinnia Jacqueminot, at the St. Louis Exposition, 1904, was awarded a Silver Medal.

### ZINNIAS (Youth and Old Age).

**Dwarf Double.** This is considered the best type for general use, forming bushy, compact plants not over 2 feet high, and bearing flowers as large as the tallest growing varieties. (See cut.) We offer them in the following six distinct colors:

|  | PER PKT. |                           | PER PKT. |
|--|----------|---------------------------|----------|
| 4445 Dwarf Double White  | 5        | 4446 Dwarf Double Salmon  | 5        |
| 4443 — Orange  | 5        | Rose                      | 5        |
| 4444 — Scarlet   | 5        | 4442 — Jacqueminot, Rich, | 10       |
| 4441 — Canary  | 5        | deep crimson-scarlet      | 5        |
| 4450 — Mixed. Per oz., 40 cts.   | 25       |                           |          |
| 4449 Imported Collection of 6 dwarf double varieties.  | 25       |                           |          |
| 4460 Curled and Crested. A curious but beautiful strain; the petals being twisted, curled and crested into the most fantastic and graceful forms. The colors comprise all the brilliant shades characteristic of the Zinnia. | 10       |                           |          |
| 4461 Haageana Fl. Pl. ( <i>Mexican Zinnia</i> ). A splendid miniature-flowering double variety; flowers deep orange, keeping its color when dried as a winter flower.  | 10       |                           |          |
| 4462 Queen Victoria. A pure white variety of the mammoth type. The flowers are perfectly double, of fine form, and measure about 4 inches across. This excellent variety comes true from seed.                               | 15       |                           |          |
| 4463 Mammoth ( <i>Robusta Plenissima</i> ). Flowers of mammoth size, perfectly formed, very double and of striking colors; a fine strain.  | 10       |                           |          |
| 4464 Double Pompon. Small, very double cone-shaped flowers; mixed colors   | 10       |                           |          |

DWARF DOUBLE ZINNIAS.

4470 Tall Double. Tall varieties; mixed colors. Per oz., 30 cts. 5

**Double Fringed.** A new class; the petals of the perfect-shaped flowers are more or less deeply cut or fringed, a characteristic never before seen in the Zinnia. We can supply these in three colors, viz.:

4472 White 10 | 4473 Deep carmine. 10  
4474 Bright rose. 10

## BURPEE'S

A Plant of DWARF DOUBLE LILIPUT ZINNIA.

2655 DOUBLE LILIPUT. Compact bushes, bearing small perfectly double pompon-shaped flowers of the brightest colors, which cover the plants during the entire summer and until frost sets in. 10

2657 GIANT MAMMOTH. Of unusually robust habit of growth and immense size, the perfectly formed double flowers are of various striking colors. Plants three to three and a quarter feet high, and bloom during a long period. 10

2659 POMPON. The petals are piled in a symmetrical smooth cone. The colors range from pure white, through creams and buffs, to a chrome-yellow. Then, again, there are tints ranging from softest pink to the deepest crimson. 10

2661 Dwarf Snowball. Dahlia-like flowers, perfectly double and of the purest snow-white. 10

2663 Dwarf Fireball (*Zinnia pumila coccinea plena*). Double flowers of a dazzling fiery scarlet. 10

2665 Striped Zebra. Double flowers; distinctly striped, but only a small percentage come true. 10

## R. & J. FARQUHAR & CO.

Scarlet Gem, Double Zinnia.

No. 8367. ZINNIA, DWARF, SCARLET GEM. One of the most charming introductions, the plants fairly bristling with double blooms of intense, dazzling scarlet. Oz., \$1.25; pkt., .10; 3 pkts., .25.

ARLINGTON FARM TRIALS, 1906.

PETUNIA:

422. Single striped and blotched (C.D. 341, 15 lbs.), Thorburn  
Planted.....

*Fair look*

423. Hybrida, choice mixed, Planted.....

S. & G.

*at good all dark mixture*

424. Hybrida finest, (C.D. 285, 5 lbs), Planted.... S. & G.

*Very many as good as 422*

425. Hybrida mixed (C.D. 369, 18 1/2 lbs.),  
Planted.....

Morrison

*Fair look and mixture of colors*

426. Hybrida alba, Planted.....

S. & G.

*look*

427. Nyctaginiflora, Planted.....

Vilmorin

*Good*

PETUNIA:

428. Phoenicea or purple, Planted..... Vilmorin

*This resembles Countess of Ellesmere in color but is more of a solid purple with some white in the throat. It is a very good plant and grows very well in pots. It is a very good plant and grows very well in pots.*

429. Pyramidal or tree, Planted..... Vilmorin

*It is a very good plant and grows very well in pots. It is a very good plant and grows very well in pots.*

430. Inimitable striped and blotched, Planted..... Benary

*Good mixed - Tall, strong grower & flowers of good size.*

431. Inimitable (C.D. 284, 15 lbs.), Planted.... S. & G.

*Rather better mixture than 430 and more dense. This does not differ much from the rest of the common ones.*

432. Hybrida belle etoile striped, Planted..... S. & G.

*A good mixture of common.*

433. Hybrida belle etoile striped, Planted..... Benary

*A very good mixture. It is a very good mixture and grows very well in pots.*

435. Hybrida Countess of Ellesmere (C.D. 340, 50#), Thorburn

*Good lot.*

435-A. Hybrida Countess of Ellesmere (C.D. 439), Thorburn

*This is good and grows very well in pots. It is a very good plant and grows very well in pots.*

PETUNIA:

436. Hybrida Countess of Ellesmere, (C. D.388, 6#), Morrison  
Planted.....

Poor - got mixed.

437. Hybrida illustris (rose carmine), Planted.... S. & G.

not fine. most of the plants have flowers of a washed out rose color  
with white throat - in some the color is deeper & the throat is  
black. all plants vigorous & showy. flowers a little  
larger than in Countess & E.

438. Hybrida illustris, Planted.....

Benary

same as 437

439. Hybrida adonis, (carmine red), Planted..... Vilmorin

a stock of low bushy & thick & very good the size of  
Countess & Ellesmere but not vigorous. Flowers with white eye

440. Hybrida adonis, Planted.....

Benary

As 439 but plants grow larger

441. Hybrida brilliant, Planted.....

Vilmorin

Bright peach pink, large flowers than in C. & E. white  
throat & no under, always less vigorous  
than the Countess & E.

442. Hybrida brilliant, Planted.....

Benary

As 441 but some of the plants in the row like adonis.

443. Hybrida Lord Courtenay, Planted.....- Veitch  
Resembles Brideham - but not same size & shape in flower  
with the throat more lined with yellow flowers - all the  
stems were cut to small pieces along the ground - some by accident  
not purpose.
444. Hybrida erfordia (rosy morn), Planted..... Vilmorin  
Some fine but not as good as the one at the bottom  
of the row - it was a new one from the bottom of the row  
July 28. As 74
445. Hybrida erfordia (rosy morn) (C.D. 307, 5 lbs) Vilmorin  
Planted.....  
as good as 444 or better.  
July 28. Profuse bloomer, needs a little brighter color  
this is the only real good stock here to give.
446. Hybrida erfordia , Planted..... Benary  
Mixed, some erfordia & mostly colors brilliant.  
July 28. Also some common mixed
447. Hybrida erfordia (rosy morn), Planted.... Heinemann  
Went off a long time with out to see plants  
in the row
448. Hybrida, new star varieties, Planted.... Heinemann  
I saw only 2 star flower plants - others mixed.  
July 28. Many others have a fine velvety color deep red + are very fine, may  
be a good stock on selection purposes
- 448-A. Howard Star, Planted..... Ross Bros.  
Nothing but a good stock of mixed colors.  
July 28. This would make up mainly the mixture of common but nothing else.
449. Hybrida little fairy (compacta magnifica), Planted..... Heinemann  
Planted.....  
all kinds of small flowered sorts - mixed  
July 28. Some very nice but a good mixture of small varieties

PETUNIA:

450. Striped and mixed (dwarf inimitable), Vilmorin  
Planted.....

*Stock only fair.*

451. Compacta nana multiflora (dwarf inimitable), Benary  
Planted.....

*This is good mixture. Flowers mostly white starred in  
maroon ground or maroon stars on white ground  
Jug 2nd for selection work*

452. Compacta nana multiflora (inimitable), S. & G.  
Planted.....

*Not quite as good as 451*

453. Inimitable dwarf striped and blotched, S. & G.  
Planted.....

*Poor, not dwarf at all.*

454. Compacta nana stellaris, Planted..... Benary

*A mixture 2 plants with starred flowers.*

455. Bright rose, white starred, Planted..... Vilmorin

*Plants in different. The true white starred ones are fine  
Plants dwarf & compact.  
July 28. Best stock from which several good mixed varieties*

456. Snowball compacta, Planted..... S. & G.

*Not very good. Some good plants but none at all*

PETUNIA:

457. Snowball compacta, Planted..... Benary  
*I have in my garden at home at home*

458. Snowball compacta, Planted..... Vilmorin  
*same as 457*

459. Kermesina crimson, Planted..... S. & G.  
*This is a richish maroon, just like 428 but with the flowers larger. Plants profuse growers with large leaves.*

460. Kermesina, Planted..... Benary  
*Look not so good as 459*

461. General Dodds, dark red, Planted.... S. & G.  
*Looks as 459*

462. Nana compacta purpurea purple violet, Heinemann  
Planted.....  
*These are very distinctive, compact plants about 6 to 8 inches high, leaves narrow, flowers dark maroon with dark throat, eyes navy & reflected.*

PETUNIA:

463. Dwarf compact purple white center,  
Planted.....

Vilmorin

*... be ... as a purple ...*

464. Carmen sylva, Planted.....

Benary

*This is a ... like 463 but ...  
little ...*

465. Intus aurea, Planted.....

Benary

*Flower layer with wavy reflexed edges ...  
... with ...*
